## 

#### OVERVIEW

### Speed App Development and Delivery with Cloud Automation

Torque is a SaaS platform for delivering Infrastructure Automation at Scale for complex application-centric environments on cloud technologies including AWS, Azure, and Kubernetes. IT leaders and DevOps innovators around the world trust Quali to enable self-service automation and governance to streamline application development, testing, and release to production.

#### BENEFITS

SELF-SERVICE

Speed time to market with out-of-the-box support to CI/CD pipelines to deploy a common environment definition from Dev to Production

#### AUTOMATE & ORCHESTRATE

Quickly model applicationcentric templates aligned to business needs

#### GOVERNANCE

Manage AWS and Azure cloud resources efficiently with application-centric cost tracking

#### SCALABLE INFRASTRUCTURE AUTOMATION

ENTERPRISE DEVOPS

Scale DevOps 3X with self-service

application environments

**Deliver** Environments On-Demand

**Simplify** Deployment to Production

**Govern** The Use of Cloud Resources **Gain** Security and Compliance

View Single Pane of Glass for Mixed Cloud

#### SELF-SERVICE ENVIRONMENTS

Enable your developers and other users to access the cloud infrastructure & application environments they need, on demand- using the power of Environments as a service (EaaS) - through a GUI portal, your CI/CD tools, and a CLI.

#### MANAGE CLOUD COSTS

Eliminate uncertainty and avoid over-spending in your cloud accounts with the ability to automatically tag and de-commission resources, embed policy management, and provide Role Based Access Control to resources.

#### SEAMLESS CI/CD INTEGRATION

Natively integrate into your organization's DevOps ecosystem and CI/CD pipeline to support continuous environments.

#### SIMPLE BLUEPRINT MODELING

Build reusable environment templates on AWS, Azure, and Kubernetes using sourced controlled YAMLs or a user-friendly UI and Torque's open framework to connect the tools you're already using to automate the set-up and tear-down of complex application-centric environments in a repeatable, reliable manner.

#### FRICTIONLESS GOVERNANCE

Ensure company compliance is maintained and enforced with policies that control usage, security, costs, and prevent sprawl without adding speed-killing friction to developement and innovation cycles.
