*I want all my people empowered with tools to participate and thrive in today's digital world.*

*Empowering people*

*We believe that accessibility is essential to fulfilling the mission to empower every person to achieve more. We believe that everyone, regardless of their role, location or abilities, should be equipped with the right tools and information so they can be effective at work. Through our training and support we enable more digital inclusion with Microsoft 365.*

Microsoft offers a wide range of accessibility tools and app's.

---

*Guidance and support on using accessibility tools and app's*

The accessibility training session we offer is a personalized session focusing on how Microsoft accessibility tools and apps can help in specific tasks or work routines and methods. We spend time with the individual to work out their needs and devise the best course of action. During the Accessibility training one of our experienced trainers shows your employees how to get the best out of any assistive tech-tools to support their work, such as magnifiers, Dictaphones, or colour overlays.

*How does it work?*

Our personalized approach ensures that employees learn what they need in their work. We teach them new skills and discover the power of Microsoft accessibility tools and app's with step-by-step guidance. Our team of trainers understand the potential barriers in the workplace which may be disabling and active coach and guide to get more out of the existing tools.
