

The image features two men in a professional setting, likely a meeting or collaborative work environment. The man in the foreground is wearing glasses and has a beard, looking intently at something off-camera. The man in the background is also wearing glasses and is slightly out of focus. Overlaid on the image are several semi-transparent data visualization elements, including a candlestick chart with red and teal bars and a table with columns of data. The overall color palette is dominated by blues and teals, with a soft, blurred background.

Azure Analysis Services to Power BI Premium per user migration

Azure Analysis Services to Power BI Premium per user migration

If your organization is struggling with the size of its Azure Analytics Services database model, migrating it to Power BI Premium allows you to:

- Grow the size of your Power BI models.
- Empower your users.
- Optimize your organization's costs.

Empower your team with Power BI Premium per user

For \$20/month per user, Power BI Premium allows your organization to have data models with a size of up to 100GB per user and gives them access to Power BI Pro and Premium features, such as self-service report building, sharing, paginated reports, and advanced AI. It also significantly improves your database model's performance while reducing your organization's expenses.

Power BI
PREMIUM
per User
 Microsoft

Quick deployment

With several years of experience with data models and thousands of projects under its belt, our team developed a service package that assesses, adapts, and deploys your Azure Analysis Services model in the Power BI Premium per user environment in just a few days.

Work agenda:

- Analytical model overview with the client.
- Power BI workspace setup and configuration according to the latest best practices.
- Model migration to the Power BI Premium workspace environment.
- Model assessment, review and recommendations.
