INTRODUCING INDUSTRIAL INTELLIGENCE QUICKSTART

UPTAKE FUSION

Discover how Uptake Fusion can turn data into industrial intelligence.

Using OT data to solve an enterprise business challenge is hard to pull off and difficult to prove value. We made it easier to accomplish both. Industrial Intelligence Quickstart: Fusion allows companies to experience the power of Uptake Fusion and document the business impact before making a larger investment.

Professional Services helps companies accelerate the adoption of Uptake products and maximize business value from using them. Engagements are limited in time and defined in a scope of work, so your company gets exactly what it needs.

LOW RISK. DEFINED SCOPE. QUICK PROOF OF VALUE.

Industrial Intelligence Quickstart provides a three-week deployment of Uptake Fusion to evaluate its ability to liberate your OT data and turn it into industrial intelligence.

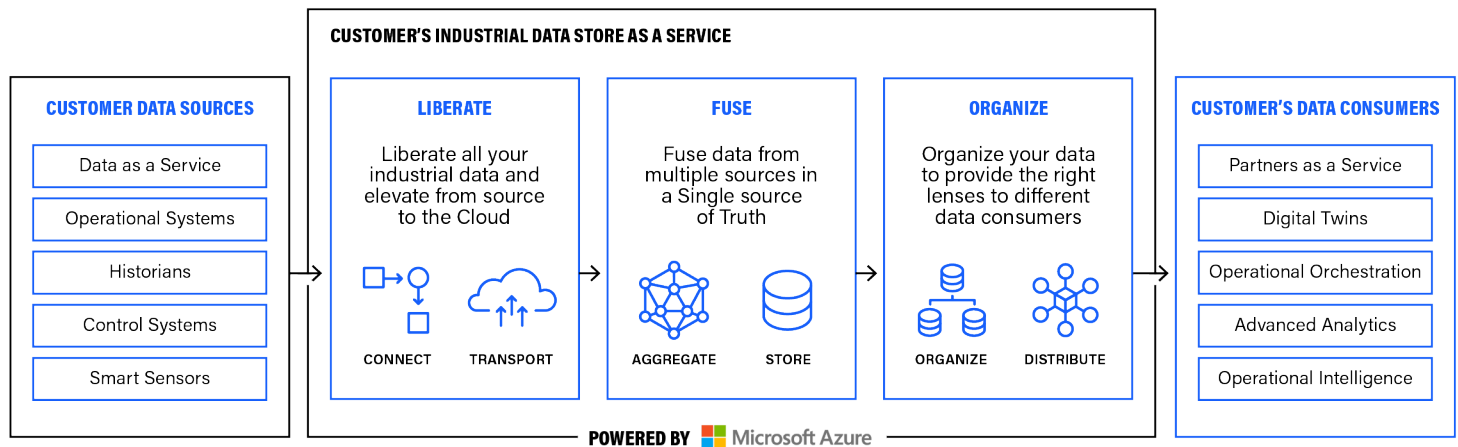

The experts from Uptake Professional Services assist your company with setup and configuration. Both are quick to complete. In just a few weeks, you'll have all the proof you need of Uptake's value for your business.

ELIMINATE COMPLEXITY. SPEED UP DECISION-MAKING.

Operational technology (OT) data stored in systems like DCSs, PLCs, SCADA, and Historians is hard to access and share. You're hit with tags and fees. Liberate your data with Uptake Fusion.

Fusion enables and accelerates the process of moving data from industrial sites, facilities, and data centers to Microsoft Azure. Setup and data migration are simple. Just connect it to move and store data in the cloud where it can be organized, unified, and contextualized.

Once your data is in the cloud, it's securely accessible to everyone given access. Better yet, put your data to work, transforming it into intelligence using Uptake products, including our library of 2,000 Industrial Data Science models and Asset Strategy Library® (ASL®), filled with asset failure data and industry best practices. Your OT data, enriched with Uptake data science ASL® content, will surface insights that help optimize costs, manage risk, and increase revenue assurance.

WITH UPTAKE FUSION, YOU CAN:

- Liberate OT data and make it accessible to the right people, anywhere, anytime
- Bypass excessive "per tag" fees for moving and accessing your own data
- Create curated data sets from time-series, transactional, design data
- Unlock your potential with insights, timely information, and intelligence
- Leverage Fusion connectors for PI and Ignition that streamline data transfer
- Securely move, store, and access data regardless of technology

Key Industries

	Asset Performance Monitoring and Diagnostics	Operations Performance Monitoring	Production & Regulatory Reporting
Oil and Gas	<ul style="list-style-type: none"> • Well and facility downtime tracking by cause • Site status monitoring 	<ul style="list-style-type: none"> • Well production performance reporting • Offset fracking monitoring 	<ul style="list-style-type: none"> • Well communication exception tracking and reporting • Track facility operation against safe operating limits
Power and Utilities	<ul style="list-style-type: none"> • Generation performance monitoring by asset • Transformer performance monitoring 	<ul style="list-style-type: none"> • Monitor generation sources • Monitor T&D systems 	<ul style="list-style-type: none"> • Water record monitoring • Outage tracking and reporting
Mining	<ul style="list-style-type: none"> • Mobile equipment performance monitoring • Plant asset performance monitoring 	<ul style="list-style-type: none"> • Plant production reporting • Inventory level monitoring • Process variability 	<ul style="list-style-type: none"> • Energy management information reporting • Delay reporting • Chemical and water usage reporting
Manufacturing	<ul style="list-style-type: none"> • Downtime tracking • Equipment performance 	<ul style="list-style-type: none"> • Work in progress • Quality deviation monitoring 	<ul style="list-style-type: none"> • Production defects • Production line reporting • Energy management information reporting

THINK INDUSTRIAL INTELLIGENCE AND LIGHTNING-QUICK IMPACT.

It's time to solve your company's challenge with accessing OT data and making it available to others. Industrial Intelligence Quickstart for Uptake Fusion makes it affordable, practically risk-free, and offers fast proof of value. Sign on today and get started right away.
