

Gaining insight

I want to understand what M365 and MS Teams can do for my organization

Empowering ideation and inspiration

We provide a sketch of what is possible and how a modern workplace can contribute to productivity, teamwork and communication. We let you experience M365's features, with extra attention for MS Teams. In this workshop we don't train skills but provide insight into the potential added value for your organization.

Preparing adoption strategy, governance & approach

Ideation Workshop

Experience the potential

See how Teams and M365 bring value to your organization

This workshop shows what a modern workplace can do for your organization in practice. Scenarios reveal how apps can be used to make the work easier, faster, and safer – all from a functional perspective. You will experience a variety of features and hidden gems that can have a major impact on productivity, teamwork and communication. The potential M365 and Teams offer will amaze you.

How does it work?

We do an intake to understand your organization's IT policy, current digital work methods and needs. This helps us determine the aspects that the workshop will focus on. Where possible, we work with industry-specific situations and examples. The features shown in this workshop provide inspiration and a functional perspective with which to enrich your IT policy. You get valuable and concrete input for your adoption strategy and approach.

The next step

Workshops in strategy or governance, after which an adoption approach is defined.
