

Protect your Office 365 content no matter where it lives—all from one service.

Office 365 Backup & Recovery

Comprehensive Backup

An unlimited backup service for your Microsoft Office 365 assets in SharePoint Online, Exchange Online, Project Online, OneDrive for Business, Groups, Teams, Planner, and Public Folders.

Recover in Minutes, Not Days

Without having to pick up the phone, schedule restore windows, or perform site-level rollback, easily restore your Office 365 artifacts for sites, libraries, OneDrive, mailboxes, Groups, or Teams.

Worry-free Backup

We run automatic backups up to four times a day and retain 100% of your data for one year. Unlimited backup subscriptions give you the flexibility you need, and the protection you want.

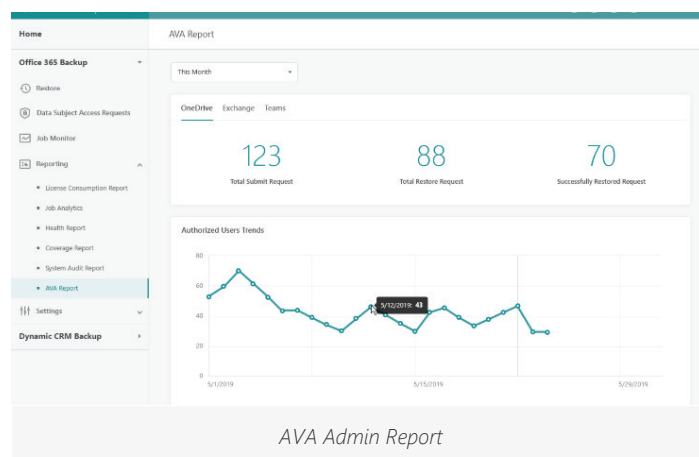

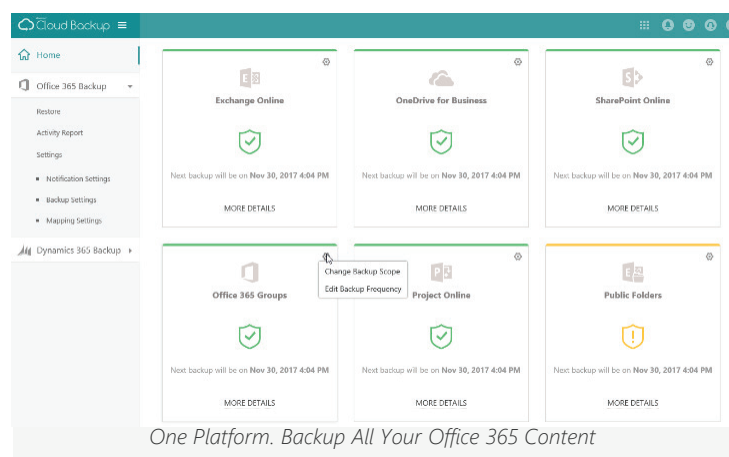

Backup on Your Terms

Choose to securely store your Office 365 backup data in our scalable Azure Storage, your private cloud, or in data center with a vendor of your choice.

The Most Complete Cloud-to-Cloud Backup Solution

AvePoint Cloud Backup is the industry's most complete cloud-to-cloud backup solution for Office 365. With unlimited, automated backups, and secure storage in AvePoint's Azure storage or your own cloud, you just decide how much to recover, and when. On-demand and granular, item-level restore provides anytime access for your business-critical emails, files, conversations, projects, tasks, Groups, Teams, Planner, and sites. Help connect your users with their lost content by automating restores with AVA, AvePoint's Virtual Assistant.

COMPREHENSIVE BACKUP

- Near-zero configuration for daily backup plans and target protection is up to 4 backups per day (or every 6 hours).
- Protection for Office 365 content including: Exchange Online, SharePoint Online, Project Online, OneDrive for Business, Groups, Teams, Planner, and Public Folders.
- Built-in business rules and filters enable you to quickly choose which content you want to backup.
- Store backups in our scalable Azure Storage with minimal configuration, or in your cloud or data center of choice with support for Microsoft Azure, Amazon S3, Dropbox, and any data destination accessible via Secure File Transfer Protocol (SFTP), File Transfer Protocol (FTP) and any S3 compatible storage.
- With Multi-Geo support for Office 365, backup data can be stored, retained, processed, security trimmed, and managed entirely in-country, guaranteeing data security and sovereignty.
- Further safeguard your data from cyberattacks or leakage by bringing your own Microsoft Azure Key Vault Encryption Key to meet compliance regulations around sensitive data.
- Enable the ability to find, select and delete users' Mailbox and OneDrive backup data to meet "Right-to-be-Forgotten" rule under the EU GDPR Article 17.

GRANULAR RESTORE

- On-demand, granular recovery of Office 365 content—including mailboxes, conversations, projects, tasks, calendars, files, Public Folders, Groups, Teams, and Planner—to the online or offline storage of your choice while maintaining all metadata and permissions.
- Granular restore doesn't just mean an individual document or version—perform security roll-backs to undo unintended permissions changes.
- Restore content and conversations to mailboxes, OneDrive, Groups, or sites—not just to its original home.
- Export and restore content outside of Office 365, including the ability to restore mail items to a PST, documents to a file share, and download Teams Files and Channel Conversations via the Export feature.
- Recover quickly with time- or object-based restores by locating business-critical files or emails with full-text search capability for rapid discovery.
- Delegate restores to lower-level administrators and power users in Cloud Backup by any Office 365 scope.
- AVA, AvePoint's Virtual Assistant, is a chatbot that automatically responds to end users' chat requests to recover and restore lost content. Monitor AVA's activities via AVA Admin Reports.
