

What's for Employees?

Request content.

Employees can go for on-demand content - that can be a use-case, a 2-minute topic explainer video or need more understanding.

With the browser based labs now they can do coding practise anytime and anywhere.

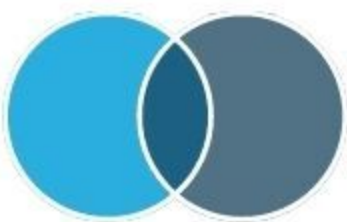

Get response to queries in real-time by our AI. It saves hours wasted in finding write answer from forums.

Learner themselves can create their own learning paths or they can be assigned by their stakeholder.

With extensive quizzes and multiple assignments employees will know their improvement areas.

Prebuild specialization program will help them understand the path clearly for themselves.

Hybrid training model will help them get deeper understanding into the topic

Because the content is crowd-sourced cross company knowledge transfer will take place
