

Okta to Azure AD Migration

Enjoy all Azure AD has to offer.

Package Highlights

Better manage access across a hybrid infrastructure

Seamless native integration between Office 365 and Azure AD

Seamless Single Sign-On and Azure AD

enhanced security, identity, and response capabilities

Reduce costs and simplify authentication

Many organisations who are currently using the Okta platform for application integration want to simplify authentication and reduce costs – but they all share uncertainties around where to begin.

Originally, some organisations chose to use Okta in order to have an alternative cloud Identity Provider to ADFS.

Unfortunately, many of the organisations using Okta haven't successfully integrated Office 365, therefore leaving them with multiple identity providers. What's more, they're also paying for a service which simple isn't necessary.

It's possible, however, to consolidate identity providers, saving money by moving away from a redundant vendor. Such a move also opens up possibilities such as Seamless Single Sign-On – a feature that's only available on- premise with Okta. These organisations can also utilise Azure functionality such as session control, conditional access, and enhanced security.

Who is This Package For?

Organisations that are wanting to move from ADFS in order to utilise the enhanced functionality of Azure AD, including advanced identity protection features.

Package Objectives

- ✓ Move away from a redundant vendor
- ✓ Consolidate identity providers
- ✓ Introduce Seamless Single Sign-On
- ✓ Utilise Azure functionality, such as session control, conditional access, and enhanced security.

What We'll Do

- ▶▶▶ Hold an initial workshop (remote or on-site) to gather the required info around key systems.
- ▶▶▶ Staged application migration, from Okta to Azure AD
- ▶▶▶ Migration to Azure AD as the identity provider
- ▶▶▶ Defederation (if required) and decommissioning of Okta
- ▶▶▶ Supporting documentation

What Will The Outcomes Be?

- ✓ A platform to manage employee, customer, and partner access to any app across a hybrid infrastructure
- ✓ A platform to set conditions and controls for on-prem and web applications, including protection with the Microsoft Intelligent Security Graph
- ✓ Cost-savings associated with reducing vendor relationships
- ✓ Seamless single Sign-On

Want to Know More?

Identity Experts is a distinguished, UK-based Microsoft Gold Partner, focused on identity access management (IAM) and security.

Since 2014, our passionate team of experts has worked alongside organisations to provide a holistic approach to their technological needs, backed by experience and ever-expanding knowledge, and our partner relationships.

Together, we help to ensure our customers' security, create savings on resources such as time and cost, and underpin further organisational transformation.

With direct links into Microsoft's product engineering teams, we're able to provide best-in-class implementation services, influence product roadmaps, and represent Microsoft Consulting Services and the Microsoft FastTrack team.
