

Disrupt your
organisation with
our self-publishing
assessment tool

 pedagogoo

Content powered by
measureupTM

*With Pedagogoo
you always score!*

Pedagoo is a self-publishing assessment tool designed to facilitate companies, educational institutions, certification organisations, recruitment agencies and many more to easily create knowledge assessments and practice tests.

With Pedagoo the learning process is quick and effective, powered by the explanation of each question created via the platform.

Create your own content with multiple item types, including performance-based questions, and mix it with the existing MeasureUp database of more than 18,000 questions

Save time and money with role-based assessments and customise your selection and evaluation process to suit your needs

Benefit from powerful analytics and learn from your results to focus on the areas of improvement with custom remediation using practice test mode

Accelerate the onboarding and empower the assessment features in your LMS with our connection

LTI

Our toolkit of combined solutions

Pedagoo is a combination of tools that work together in order to facilitate personalised education and learning processes, allowing users to advance on their own terms registering any progress made. This process guarantees the correct assimilation of content and its use.

Manage and distribute your content centrally

My Account

Your organisation can be as big as you desire

MeasureUp catalogue

A database of more than 18,000 questions

Learning Locker

Hundreds of thousands tests launched each year

How Pedagogoo is adding value through technology

Companies

Continuous learning

Introduce continuous learning in your organisation and use our technology to help you to reduce the time needed for interiorisation and change management within your team.

You can continuously evaluate and train the knowledge of your employees in any area, validate the progress of your career plans or even include formal tests to measure corporate compliance or existing quality control norms and procedures.

Certification

Create your official practice tests

Provide your organisation with your own official practice tests to help your candidates in their certification journey, preparing them for the exam day and increasing their confidence.

Our technology allows candidates to configure each test launch, detect their areas for improvement and continue learning via the available explanation sections.

Education

Transform paper to digital

We will help you to transform your education center moving all your educational materials, evaluations and exams from paper to digital.

Your teachers will be able to share questions and existing exams within the organisation and analyse the results of each class automatically by using our analytics reports.

Recruitment

Optimise your selection process

Evaluate the technical knowledge of your candidates by creating your own questions and combining them with the available database of more than 18,000 MeasureUp questions.

We will help you to select the ideal candidate reducing the time spent on your recruitment process.
