"The **solution for evaluating** employees and candidates **remotely**"

‹✓› pedagoo
Powered By **measureup**

Technological platform
for remote evaluation

Pedagoo is the technological tool developed by **Media Interactiva** to help organizations **train** and **evaluate** their employees and candidates.

A user-friendly, **intuitive platform** that allows users to easily create their own examinations, **adapting** to each organization's unique **training needs and selection processes.**

Since **Pedagoo** is optimized to enhance its users' skills, employees can **learn at their own pace** while **testing their knowledge** with a **flexible** and **effective** method, including **real-time error correction.**

Continuous learning and optimization of selection processes

What **value** does Pedagoo bring to your **company**?

We help you **transform your organization** through a **continuous learning process:** reducing time spent on training and employee evaluation, change management, and candidate recruitment.

Validate the progress of your development plans and introduce **formal evaluations** to uphold your organization´s **corporate compliance** program and existing **quality standards.**

No matter what, you will be able to train and evaluate your candidates.

- Periodic training adapted to different needs and job positions.
- Real-time evaluation of employees' knowledge and skills.
- Preparing staff for official certification exams.
- Report-based monitoring of training plans.
