

# COLLABORATING EFFICIENTLY WITH MICROSOFT SHAREPOINT MIGRATION

Collaboration is no longer a choice. Nor a privilege. Organizations are moving away from legacy document management systems. Over 200 million users around the world prefer Microsoft SharePoint for enterprise-wide collaboration and efficient document management.

ITC Infotech is leading the game with 100% success rate in migration solutions over the past 12 years. Expertise in multiple technologies supported more than 200,000 users and terabytes of data during project execution.

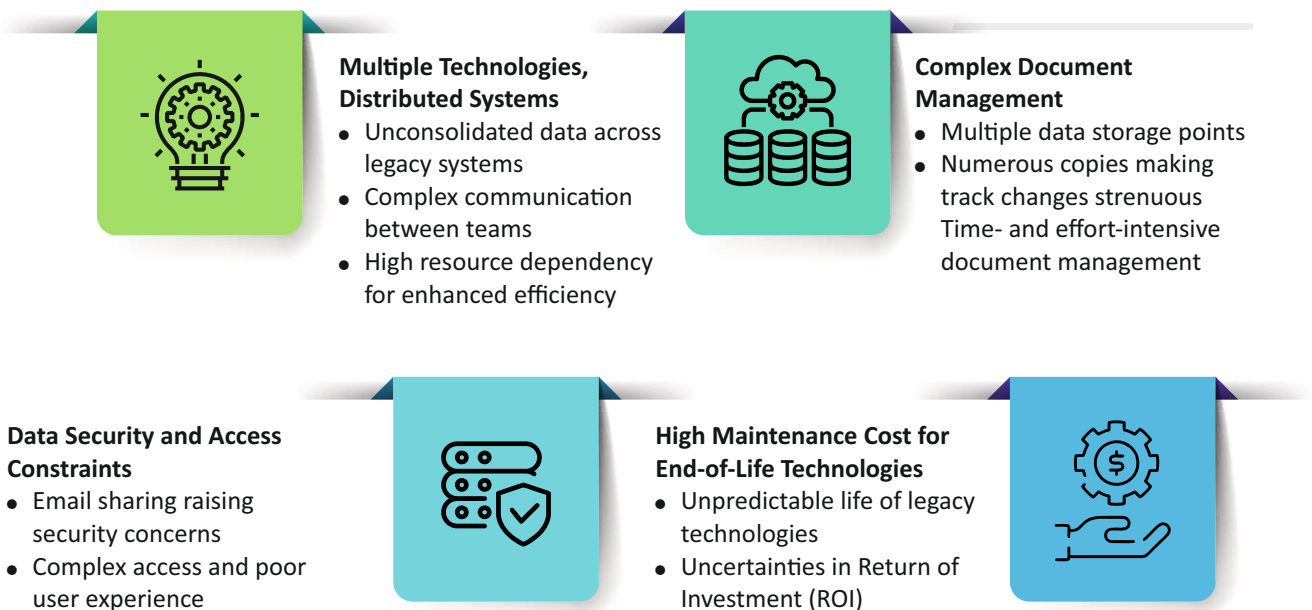

Our migration framework and accelerators are built to achieve zero data loss, faster migration and seamless business continuity. It enables organizations to increase the collaboration maturity level in all aspects, including people, process and technology.

## Microsoft SharePoint: The Keyword for Better Collaborations

Microsoft has been consistently upgrading Office 365, SharePoint and other collaboration solutions. SharePoint on cloud paves the way for easy integration, file sharing and faster digital transformation.

End of life legacy technologies such as Lotus Notes, custom home-grown old applications and other file sharing systems, though had its benefits, leave us wanting more in this new age. Changing business acumen and collaboration fuels the need for migration to greener pastures like cloud and upgrading SharePoint to the latest version. This helps to stay advanced and flexible and gain better ROI with cloud intelligence and automation.

## Challenges Driving SharePoint Migration
