

Drive 365

Modernize digital commerce in 90 days without disturbing customers' existing ERP workloads

AN IDEAL PLATFORM
CAN SEAMLESSLY
ABSORB HIGH
TRANSACTION
VOLUMES

The Challenge

Digital commerce is rapidly evolving, as the customer of today requires personalized journey. The disruptions caused by COVID-19 call for businesses to adopt robust eCommerce platforms. An ideal platform can seamlessly absorb high transaction volumes and deliver a connected digital commerce experience across all touchpoints.

Microsoft has intuitively designed systems that offer robust functionalities and offer connected experiences. Multiple medium and large-sized companies have been relying on Microsoft Dynamics AX 2012. However, Microsoft is ending its mainstream and extended support for Dynamics AX in the coming year, which means no security updates, self-service support, warranty claims, etc.

Moreover, implementing Microsoft Dynamics 365 as a novel ERP platform is laborious and time exhausting. It calls for an ideal solution, which enables robust eCommerce adoption through smooth migration from Microsoft Dynamics AX to Dynamics 365 without revamping the entire platform.

Introducing Drive365

Drive365 by **Visionet** is a migration package, which enables seamless Dynamics 365 Commerce adoptions. It streamlines B2B partner connectivity and real-time visibility through our proprietary data connector. Our phased approach ensures quick go-live of Microsoft Dynamics Commerce 365 storefronts, and plug and play integration between Microsoft Dynamics AX 2012 and Dynamics 365 leads to continuity – while data connects seamlessly with the new system.

This multi-phased migration package consists of the following:

Web shop themes

Data migration automation

HQ configuration template

eCommerce analytics

Complete migration journey by Drive365

By leveraging our expertise, we can help you go-live in less than 90 days, whereas the complete migration spreads on 32 weeks. It further entails order management & customer service, financial management, procurement & sourcing, and warehouse management, etc., allowing you to transition your back office, store, and remaining workloads in phases.

Duration		Features	Enterprise System Integration	Data Migration	
Digital Commerce go-live in less than 90 days 16	Crawl	Digital commerce	<ul style="list-style-type: none"> Web shop with all out-of-the box features (1 web shop, 1 locale) Design and UI tweaks based on Starter Kit/Pre-built theme Standard Discounts & Coupons Standard Email Templates Payment Platform (Adyen) Tax Compliance (Avalara) Google Analytics (Reporting) SEO, Content Support Fraud Management (D365 Fraud) Full Creative and Advanced Theming (Optional) Marketing Automation/Integration (Optional) 	<ul style="list-style-type: none"> DAX 2012 to D365 <ul style="list-style-type: none"> Products, Pricing, Available Inventory Return Order D365 to DAX 2012 <ul style="list-style-type: none"> Customer Order Fulfillment and Status Updates 	<ul style="list-style-type: none"> Products and Attributes Product Pricing Product Images Customers, B2C Customer Migration Inventory Opening Balances
