ASCENT SOLUTIONS

Azure Sentinel

Gain a bird's eye view across your enterprise

Experience the efficiencies of managed detection and response with a true cloud native SIEM, deployed and continuously improved by a team of cybersecurity experts.

Microsoft Azure Sentinel is a scalable, cloud-native, security information event management (SIEM) and security orchestration automated response (SOAR) solution. Azure Sentinel delivers intelligent security analytics and threat detection across the enterprise, providing a single solution for threat visibility, proactive hunting, and threat response.

Why customers choose Azure Sentinel managed by Ascent

- Mitigate security risks
- Real-time analysis and alerting
- Faster time to value with minimal staffing changes
- Replace costly and inefficient SIEM solutions

DISCOVER THREATS

Discover threats to your Microsoft 365 cloud and on-premises environments across email, identity and data.

Analyze your requirements and priorities for a SIEM deployment, define scope & deploy Azure Sentinel in your environment.

MITIGATE THREATS

Understand how to mitigate threats by showing how Microsoft 365 and Azure security solutions can help mitigate and protect against current and emerging threats.

Discover threats and demonstrate how to automate responses with remote monitoring and proactive threat hunting to discover attack indicators.

NEXT STEPS

Plan next steps and provide information to build a business case for a production deployment of Azure Sentinel including a technical deployment roadmap.

Recommend next steps on how to proceed with a production implementation of Azure Sentinel.

A large, retail parent company worked with Ascent Solutions to implement an on-premises log stash server to filter the data being sent to Azure Sentinel. This helped the organization by increasing visibility, reducing alert fatigue, and reducing input data costs.

ASCENT SOLUTIONS

Ascent Solutions Microsoft Security Managed Security Services
Empowering your security teams by solving the security talent problem

EXPERT MANAGED SERVICES
- Flexible and scalable services to meet any security team needs
- Easily integrate into your support environment and processes
- 24x7 or 9x5 managed service support (US and International)

A DEVOPS APPROACH TO MANAGED SERVICES
- DevOps approach - prioritize, execute, and release
- Improving business outcomes by focusing on quality and automation for improved efficiency
- Consultative approach to managed services

INCLUDE SECURITY ADVISORY SERVICES
- Manage Microsoft security product and feature updates and releases
- Routine Secure Score reviews and health checks
- Proactive Microsoft security recommendations and advisories

Microsoft Security Managed Services

Our promise to you
World-class Microsoft security managed services with the flexibility and efficiency to move at the speed of business.

About Ascent Solutions
- Microsoft Security 20/20 Global Partner of the Year Award Finalist – Azure Security Deployment Category
- Microsoft Security and Manageability Elite Partner
- Experienced Adoption and Change Management Practice
- 45+ years of prior Microsoft executive leadership

Ascent Solutions Security Services

Risk-Based Security: With a team of prior military cyber warriors and security industry leaders, our team combines military warfare tactics, techniques, and procedures with industry best practices. Our unique approach enables organizations to refocus on security risks to drive security strategy, operations, and tactics. This enables security and the business to be mutually supporting environment and aligns both security and business strategies and objectives. **Our mission** is to help organizations build and mature sustainable security programs and teams built on the foundation of the risk principles.
