

HSO Construction Power Pack!

Help your Team Transform their daily processing rituals.

Provide your on-site teams with quick, efficient ways to capture their daily requirements and documentation, as well as track outstanding activities.

What is the HSO Construction Power Pack?

The HSO Construction Power Pack provides a range of small, embedded tools to help with daily jobs and to sign off completion snag list processing, within the Microsoft Dynamics 365 world. This includes transfer of inventory from central stores to site, full capture of snagging requirements and tracking of non-conformances and quality claims. Let us help turn your problems into solutions!

Why customers use the HSO Construction Power Pack!

- Tablet/Mobile access to complete tasks
- One solution to use
- Visibility for all
- Control of inventory
- Recovery of costs

Improve on-site data capture

- Record your snags by site and plot
- Capture photographic evidence
- Run through configured check lists
- Ensure continuity of assessment
- Keep handover/sign offs on track

Request stock

- Call off inventory from central stores
- Track additional material usage
- Analyse costs
- Manage on-site inventory

Analyse Non-Conformance

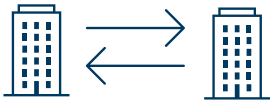

- Record non-conforming products
- Capture critical information
- Send emails to suppliers
- Ensure cost recoveries

Great Value for Money!

Each of these individual apps is designed to improve one area within Microsoft Dynamics 365. Having them all combined into one easy-to-implement pack is time-saving and huge value for money! Give your Team the help that they need and give the organisation the visibility to make informed decisions.

Remove Paper-based Processes and Increase Efficiency within Microsoft Dynamics 365 Supply Chain

Inventory transfer App

- Make use of central buying
- Limit on-site stock holding
- Quick and easy call off of stock

Snagging App

- Pre-configured check lists
- Easy capture of snags
- Track conformance with consistency
- Log against each site and plot

Non-Conformance App

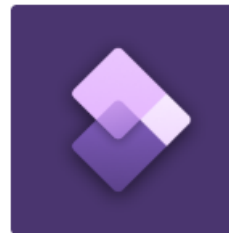

- Raise a log for non-conforming products
- Capture evidence using photos
- Track claims against suppliers
- Communicate using email

3 Tools To Help Your Team

Together, let's improve your processes!

- We can tailor the apps to suit your business
- Take all 3 apps or just take the ones that add value to you
- We can also train your team on how to customise the solutions
- No increased licensing costs for users already licensed with Microsoft Dynamics 365

Better Together! All Our Apps work directly with Microsoft Dynamics 365 Finance and Supply Chain and use the best of the Power Platform with Embedded Canvas Apps and Power Automate Flows!

Why the HSO Construction Power Pack?

Each of our 3 tools are aimed at helping utilise standard functionality within Microsoft Dynamics 365 when on-site infrastructure is challenging. The tools have been developed, based on our experience of implementing Microsoft Dynamics 365 projects. We understand that moving to an ERP System can be daunting and often there are multiple fit-work-arounds that your teams must adopt. Using Embedded Power Canvas Apps and Power Automate we can help your business by improving some of those processes that take up time and effort.

Why HSO?

Our Power Platform Team at HSO are made up of Microsoft Dynamics 365 Finance and Supply Chain Consultants, many of whom have come from an end-user background. Being an Inner Circle Partner with Microsoft, you are in safe hands with us.
