# Azure Security Strategic Orientation Get ready to set the course

# **ABOUT MaibornWolff:**

MaibornWolff stands for excellence in software development and consulting since 1989. Focusing on our customer and end users, we put human beings at the center of all our efforts. We approach Cyber security as a holistic endeavor looking at humans, organization & processes and the underlying technical foundation.

## See what customers are saying:

"When there are decisions to be made about how we build Services on Azure, MaibornWolff never fails to provide a combination of big picture thinking and technical expertise. This helps us build resilient, secure and safe solutions"

– Nils Bending, Dräger

### WHAT WE OFFER

You are running workloads on Azure or are considering a migration? It is the right time to look at your endeavors from a security perspective.

Our 1-day Azure Security strategic orientation workshop is addressed at senior management. The goal is to enable the participants to lead the company's (migration) efforts in the right direction by answering the following questions:

- What are the most relevant cyber-security related topics in the cloud?
- Which topics need immediate management attention? What are the questions I have to challenge my team with?
- Which challenges can be tackled quickly by using Azure's built-in security tooling? What options do I have?

The results of a survey provided by MaibornWolff to your company will be used as a basis for the workshop.

Your takeaways from the workshop will include:

- An overview of security topics related to running workloads in the cloud (SIEM, SOC, IAM, etc.), specifically on Azure
- A prioritized lists of security topics that require immediate management attention, based on our survey and best practices.
- An overview of which services are available to deal with your specific security challenges: Azure Security Center, Azure Defender, Azure Sentinel, etc.
- Summary of the workshop results by MW, including recommendations for next steps

The Workshop provides a closed environment that enables you to get ready to create a strong security posture within your organization, challenge your staff with the right tasks and set appropriate security goals.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## **Build on your terms**

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## **Trust your cloud**

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
