

Microsoft Azure Sentinel Workshop

Gain a bird's eye view across your enterprise with SIEM for a modern world

Workshop highlights

Understand the features and benefits of Azure Sentinel

Gain visibility into threats across email, identity, and data

Better understand, prioritize, and mitigate potential threat vectors

Create a defined deployment roadmap based on your environment and goals

Develop joint plans and next steps

As IT becomes more strategic, the importance of security grows daily. Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges—let alone tomorrow's unimagined risks.

That's why Microsoft developed Azure Sentinel, a fully cloud-native SIEM.

See and stop threats before they cause harm with an Azure Sentinel Workshop

Azure Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Get an overview of Azure Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with an Azure Sentinel Workshop.

Choose the approach that's best for you

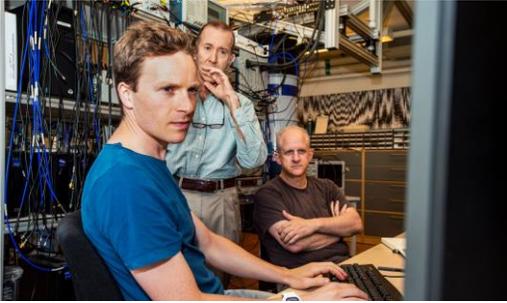

Every organization is different, so this workshop can be customized to fit your environment and goals.

Remote monitoring

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, we will demonstrate how Ingram Micro can perform remote monitoring and threat hunting for you.

Workshop objectives

Through this workshop, we will work with you to:

- **Discover threats** to your Microsoft 365 cloud and on-premises environments across email, identity and data.
- **Understand how to mitigate threats** by showing how Microsoft 365 and Azure security products can help mitigate and protect against threats that are found.
- **Plan next steps** and provide information to build a business case for a production deployment of Azure Sentinel including a technical deployment roadmap.

In addition, depending on the scenario, you will also:

Experience the benefits of a managed SIEM with a true cloud native SIEM, managed and monitored by our cybersecurity experts.

What we'll do

Analyze your requirements and priorities for a SIEM deployment

Define scope & deploy Azure Sentinel in your production environment

Remote monitoring and proactive threat hunting to discover attack indicators

Discover threats and demonstrate how to automate responses

Recommend next steps on how to proceed with a production implementation of Azure Sentinel

Why Ingram Micro?

When it comes to security, Ingram shall;

- Be your **Trusted Security Advisor** to reduce risks
- Align our solutions to **industry leading practices**
- **Exhibit flexibility** to meet your requirements
- **Tailor solutions** fitting your environment
