

Gaining confidence to reopen and manage risks in the post-pandemic business economy

Cognizant Safe Buildings provides highly customizable, Azure-enabled tools that enable robust monitoring and visualization of health and hygiene parameters for almost any environment.

Help employees and customers not only be safer but feel safer by demonstrating a commitment to their health and safety.

Manage compliance risk

Know when precautionary guidelines are being violated in real time and identify areas that can be adapted for better distancing, capacity, and "safe" healthy behavior compliance.

Trace & target

Understand who and proximity distance to people in their space, where they have been, and who they have had contact with.

USE CASE: Keeping employees safe at a large North American business offices

The pandemic has every company that operates in a physical space rethinking how to reopen or adapt their environments for workers and customers to feel safe and risk-free. Figuring out how to mitigate risks is now critical to businesses everywhere. For a company with sprawling buildings in several major cities, the challenge is keeping employees safe while maintaining high levels of productivity. With Cognizant Safe Buildings, the organization has access to a comprehensive solution that combines layering of prevention controls with instrumentation, data analytics, and technology to help make their buildings smarter - creating safer, healthier working environments that inspire trust and mitigate risk in meaningful ways now and into the future.

About Cognizant

Cognizant is one of the world's leading professional services companies, transforming clients' business, operating, and technology models for the digital era. We help clients build digital businesses and innovate products that create new value – by using sensing, insights, software, and experience to deliver on what customers demand in the digital age. Through IoT we connect the digital and physical worlds to make smart, efficient, and safe products, operations, and enterprises. Leveraging data, analytics, and AI, we drive intelligent decisions and anticipate where markets and customers are going next. Then we use those insights, combining design and software to deliver the experiences that consumers expect of their brands.
