# See and stop threats before they cause harm

## ABOUT ECF DATA, LLC:

Since 2010, ECF Data has been helping companies implement IT efficiency by placing its focus on the client's unique needs and goals

### See what customers are saying:

*"Cybersecurity, a couple of years back, is entirely different from what is it today. And, because of this, we are certain that in the future, it will also be entirely different in the future. The Azure sentinel workshop understand and mitigate threats.*

*– Tony Gage, Vice President of IT, Curaleaf*

## WHAT WE OFFER

Moving to the cloud has provided wonders for businesses in terms of cost, scalability, business continuity, just to name a few. The shift to the cloud also translates to a mobile workforce, which pushed the border of the business of the company estate, not limited to the boundary of their physical network. This burdens companies with the arduous tasks of protecting their broadened digital estate from potential cyber threats.

ECF Data offers the Azure Sentinel workshop, which introduced the re-imagined SIEM + SOAR tool. Azure Sentinel simplifies the collection of security data across the organization's users, apps, servers, devices, and any cloud. Utilizing the strength of AI, it ensures that real threats are identified quickly, and eliminates the need to set up, maintain and scale infrastructure.

The workshop runs for two days, which covers the following topics:

- Presenting the Azure Sentinel experience
- Enumerating active threats across identity, email, and data, both on-premises and cloud environments
- Illustrating automated response to threats
- Collecting the information, you need to build a business case for a production deployment of Azure Sentinel

Gain the visibility and detection you need for your cloud and on-premise infrastructure. See if you meet the requirements and avail it for free or purchase it for \$3,995.00. Contact us to find out!

# Why Microsoft 365?

## Save your company money

Microsoft 365 is available as a simple monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

## Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

## Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

## Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

## Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.

## Key use cases

### Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.
