Our Approach

Day 1: Discovery

- Discuss with key stakeholders and gather requirements
- Understand the business need and goals
- Review any existing reports
- Define core KPI's and metrics
- Get access to data extracts

Day 2: Data Modelling

- Ingest all data into Power BI using an Import
- Create the Power BI data model
- Create any Measures and Calculated Columns

Day 3: Reporting

- Design Power BI reports that align to your brand
- Build Power BI reports in alignment to your business needs
