

Complex Migration

Migration as a service

Migrating legacy content and platforms into Office 365

Embracing Office 365 as a full eco-system means carefully preparing, mapping across and migrating legacy content

Destination: [SharePoint](#), [OneDrive](#), [Teams](#), [Exchange](#)

Our Discovery services will assess your legacy content and the business processes that wrap around it to guide decisions on the most appropriate destination, mappings and ensure the 'house is in order' before you migrate.

Mimecast | EmailArchives | File Shares | Box | Dropbox | DMS | Public Folders | SharePoint
