

MORE HUMAN CYBER DEFENCE FOR CRITICAL INFRASTRUCTURE

Critical Infrastructure is increasingly at risk from persistent and sophisticated threat actors – both state-based, and non state-based.

With more and more businesses considered critical, our active cyber defence solutions are designed to provide a world class Security Operations Capability at a fraction of the cost of building it yourself.

As Australia's active cyber defence experts – specialising in Managed Detection and Response – we combine our people and knowledge with the power of Microsoft Technologies to deliver the best cyber weapon for your business security and resilience.

WHAT WE OFFER

SECURITY & RESILIENCE

Our Managed Detection and Response expertise provides you with advanced cyber operations, enterprise level security monitoring and fast response to protect your most valuable assets – your infrastructure, data and reputation.

ISO27001 Certification allows us to operate in sensitive environments.

24/7 PROTECTION & PEACE OF MIND

Critical infrastructure is at risk from long game attacks – with advanced threats lying in wait for the right time to strike.

We provide visibility and protection across all your operational technology, not just network endpoints, with our specialist 'attackers' actively hunting threats in your systems.

PROACTIVE DEFENCE AGAINST PERSISTENT THREATS

Every month we evolve your threat detection capabilities based on your needs while simulating consistent attacks to understand where modifications to your cyber security need to be made.

Our on-demand Digital Forensics and threat services can support you in the event of a compromise.

EASILY INTEGRATED, INDUSTRY STANDARD

We build custom detection IP with seamless integration with Microsoft Defender for Endpoint and Sentinel technologies, enabling us to continuously deliver a resilient security posture for your organisation.

We've proven we can reduce dwell time and the severity and likelihood of a debilitating attack.

WHAT OUR CUSTOMERS ARE SAYING

"True to their word, ParaFlare has been responsive, agile, and professional. They address our needs like it's their own business..."

– Large transport and logistics customer
