Power BI Implementation and Roll-out, The Right Way!

Rollout and adoption of Power BI without the proper assessment of needs, a robust implementation plan, and identifying the right integration points can lead to serious data and security chaos. Our Power BI Assessment and Roadmap services help organizations define the right KPIs; identify the right data sources and system integration points; and build scalable and sustainable Power BI solutions, the right way.

CHALLENGES

Rushing into the actual implementation and rollout of Power BI for your company and teams, without conducting a proper BI Assessment and developing an Implementation Plan, can cause data and security chaos, leading decision makers to question the reporting as a legitimate source of information.

IDEAL SOLUTION

Our Power BI Assessment and Roadmap package helps your company and teams identify your BI needs, understand system and data integration points needed, and develop a realistic and actionable plan for the successful Power BI implementation and rollout for your company.

DESIRED OUTCOMES

Our certified Power BI experts conduct an assessment and develop a robust Power BI Implementation and Rollout Plan to **establish your BI Strategy, maximize your Power BI return on investment, and increase your user adoption** with the Power BI platform.

Health Center Company Develops Power BI Roadmap & Implementation Plan In Working With Optimum

Aviva Health is a Federally-Qualified Health Center (FQHC), non-profit healthcare practice that maintains its clinical and patient data in various business applications, including EMR, dental, and financial applications. Optimum conducted an assessment of the Aviva's current data architecture and structure, systems of record, and BI needs and challenges and developed a roadmap with actionable steps to implement and roll-out Power BI across the organization, while addressing the user experience, relevant KPIs/metrics, systems integration using RPA for data collection and aggregation.

Project Outcomes and Results:

- **BI Roadmap and Strategy** with actionable steps to implement and roll-out Power BI across the organization
- Solution options for **RPA automation** to extract and integrate data across disparate systems
- KPI and requirements definitions for a **Proof-of-Concept** implementation of Power BI
