

# Modernise your data platform with Microsoft Azure and Power BI

At Altis we have established a dedicated Microsoft Azure practice to apply our 20+ years of experience with the Microsoft platform and industry proven approaches to the Azure Cloud to accelerate and simplify cloud adoption for data and analytics.

Our team of Microsoft certified consultants will help you with your journey to the Azure Cloud and PowerBI.

## Altis and Microsoft Azure

From over-arching advice on strategy, to development and implementation of solutions based on industry best practices, Altis is the trusted advisor and implementer for organisations seeking to leverage the Azure Cloud for Data.

With Microsoft competencies in:

- Cloud Platform
- Data Analytics
- Data Platform

Our consultants have extensive experience and proven success in implementing Azure solutions across a range of industries.

Gold

Microsoft Partner

## Azure Data Factory Frameworks

The Altis Team has created a development framework tailored to suit the unique benefits that Azure has to offer with services like:

- Azure Data Factory
- Streaming
- IoT
- Azure SQL Database
- ML

All backed up with standard approaches and features that reduce implementation time and maintenance, whilst improving reliability.

## Power BI Training and Reporting

Our Team can deliver comprehensive Power BI Reporting solutions as well as custom Power BI and Data Visualisation Workshops for you to empower your own staff.

Chat to Dawie Kruger, Altis Microsoft Azure Practice Lead, to learn how Altis can help you.

## Advisory

Working closely with business stakeholders, our Azure practice has a proven track record of delivering strategic advice for Data and Analytics in the cloud. With the aim of maximising business benefits, our roadmap puts the strategy into achievable phases, prioritising the goals of your organisation.

Our services include:

- Migration approach and roadmap definition
- Big Data and Analytics strategy
- Azure Services and toolset selection
- Reference Architectures for a full cloud or hybrid cloud approach

## Architecture Guidance

We have specialised Azure Architects who can review and make recommendations on your Azure architecture. Proposed architectures will consider your requirements and constraints around Data Volume, Data Latency, Fault Tolerance, Solution Availability, Elasticity, Privacy and Security.

## Managed Services

After your solution has been productionised, you will want to make sure that it's operational with smooth day to day running. Our trained and certified Managed Services team can provide proactive support and monitoring of your Microsoft Azure hosted solution.

## Our clients include:

Environment

## Big Data and Advanced Data Warehousing

As the importance of data in an organisation keeps growing, so does the volume and complexity of the data. With information being generated in both structured and unstructured formats, and arriving at near real-time or real-time, it is even more vital to create robust big data architectures to handle the ingestion, processing and analysis of data that is too large or complex for traditional database systems.

## Traditional Data Warehousing

For the times when your organisation simply wants to move your existing SQL Server and SSIS solutions to the cloud, our lift and shift capability will let you migrate your data, and SSIS packages and workloads to an Azure based solution, so you can still utilise your inhouse technical expertise while still reaping the scale and flexibility benefits of Azure. Using Azure SQL Database or SQL Managed Instance you can hit the ground running on your cloud journey.

Call Altis today to find out how we can help maximise your business performance.
