

PROGE LEARNING INSIGHTS

AZURE AND TEAMS HELP TO MONITOR DISTANCE LEARNING

Proge Learning Insights is a solution that, leveraging Microsoft cloud technologies, helps learning institutes to analyze important KPI in a simple and automated way.

Through the integration of Azure, Microsoft Graph API and Teams with all the information systems of universities and educational institutions, Proge Learning Insights responds in a timely, rapid and efficient way to the growing need to remotely manage lessons, laboratories and exams.

WHAT IS PROGE LEARNING INSIGHTS

Proge Learning Insights allows learning institutes to historicize and monitor the progress of remote lessons on a daily basis. Through the advanced analytics Power BI dashboard it is possible to analyze information from Teams meetings integrated with those relating to study paths (teachers, lectures, academic year, etc.).

Why customers use Proge Learning Insights

- **Fast**
No manual updates, no errors
- **Cloud oriented**
Everything is deployed in Azure
- **Easy to adopt**
Technology is containerized
- **Automated**
Human intervention is limited to the implementation phase
- **Helpful**
Valid solution to a growing issue
- **Advantageous**
Reduced operation time, better chance of success in distance learning

VALUE TO CUSTOMER

➤ Faster Reporting

➤ flexible IT platform

➤ Fast updates, error free

➤ Zero on-prem footprint
