- Goals driven
- PoC based on your data

COMPETENCIES at MAIND

- Data Analytics, Gold
- Data Platform, Silver
- Cloud Platform, Silver

SOLUTION AREAS

- BI
- Analytics
- Data Platform
- Big Data

Driving business Impact through cloud Scale Analytics.

Migrate your data analytics to Azure® and visualize them using Power BI dashboards. Drive your business by accurate and trusted insights.

Your data usually exists as traditional (on premise) or cloud databases, text files, big data or live streams. They may originate in various areas such as financial, retail, production or social networking platforms.

Be sure that our team of Data experts and DWH/BI Architects will assess all your data sources, propose 360-degree solution and suggest optimal project roadmap to fit your specific needs.

Assessment usually takes 4 to 8 weeks, including workshops and preparation of the Proof of Concept (PoC).

NOTE: The assessment duration and complexity depends on company size and data source variety.
