

Corporate Software Intelligent Dashboard

Different sources, unknown data quality ... how to get that into a rock solid dashboard?

Challenges

- Data is ubiquitous
- Data quality is unknown
- Hard to combine different sources
- Public available data is not leveraged for enrichment

- Business decisions requires data
- Data silos are not integrated, and Excel is too limited for enterprise use
- These blind spots directly affect business decision makers

Ideal Solution

- Flexible integration of almost any data source
- Minimal manual customization
- Data warehousing for good performance
- Full integration into the Microsoft 365 and Power Platform

- Find relevant insights across all data
- Cross device access
- Secure and certified hosting and world class data privacy

Desired Outcomes

- Bring the intelligent dashboard to your decision makers, any time and any device
- Unified view across all data sources
- Dashboard-driven interface, integration with the Microsoft 365 Platform and Power Platform

- Data at your PC, phone, wrist
- Powerful tooling
- Interactive filtering capabilities
- Customizable and extensible
- Scalable

Corporate Software – Intelligent Dashboard

Combining the power of your data with the Microsoft 365 and Power Platform!

Powerful

- Cloud-Based Infrastructure for world class security
- Integration with Microsoft 365 and Power Platform
- Works in KMU and Enterprise scale scenarios

Scalable

- Can target almost any data platform, even on premises
- The scale adapts to your needs – and the pricing too
- Currently 12 languages supported
- About 60 geo locations possible, worldwide

Standardized

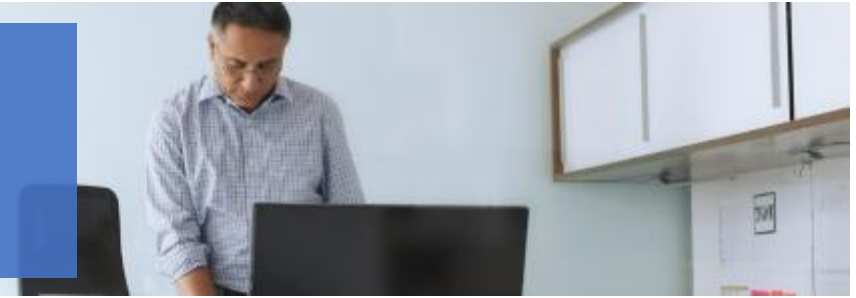

- Standard, best practice architecture
- Highly adoptable to your needs
- Builds on Azure PaaS-Services
- Supports standard protocols

Secure

- Leverages Azure security
- Data at rest and data in transit is encrypted
- Azure Information Protection integration possible

Intelligent dashboard is so valuable because it provides key insights, platform integration and cutting edge security

Corporate Software – Intelligent Dashboard

Today, everyone has enough information, but the key is to distinguish by relevance. Intelligent Dashboard combines your data silos with the Microsoft 365 and Power Platform. Unleash the power of your data with Intelligent Dashboard!

Solution Alignment

Intelligent Dashboard and Microsoft 365 – a thrilling duo

Microsoft 365 gives you a powerful toolset for your productivity – perfect for your data! Integrate them with all the tools you know and love, like Teams, Excel and PowerPoint!

Intelligent Dashboard and Power Platform – smart combination

Power Platform holds the tools for workflows and automation – Power Apps for Interaction, Power Automate for Workflows and the famous Power BI for your data analysis. Intelligent Dashboard supports the full range of integration with the Power Platform.

Intelligent Dashboard and Azure – secure information, wherever you are

Data at your fingertips is convenient. Without security, it can become dangerous. The Azure Datacenter guarantees you enterprise grade security, and with Azure Information Protection, you can go even further. Intelligent Dashboard gives you access to the whole Azure security stack.
