# MULTI-CLOUD

# SECURITY PLATFORM

As more and more organizations migrate workloads and applications to the cloud, the need for an effective, highly secure cloud foundation and zero-trust security model is more critical than ever. Neway specializes in helping organizations optimize their security posture through a Multi-Cloud Security Platform built in Azure that encompasses security controls, policy enforcement frameworks, and threat intelligence to protect against rapidly evolving threats.

## Neway will help your organization assess, develop, deploy, and optimize your cloud security architecture including:

- Develop, design, and implement a data driven information security control and policy enforcement framework that reflects scalability across Azure resources
- Assess the cloud reference architecture, capabilities and controls
- Conduct a security assessment to map current state to future state in terms of security posture and compliance
- Develop and implement a Security Controls and Policy Enforcement Framework
- Establish, deploy, and optimize an Azure Security Benchmark that provides prescriptive best practices and recommendations to help improve the security of workloads, data, and services on Azure in areas including:
  - ✓ Security operations and network protection
  - ✓ Identity and access management
  - ✓ Data protection
  - ✓ Asset management
  - ✓ Logging and threat detection
  - ✓ Incident response
  - ✓ Posture and vulnerability management
  - ✓ Endpoint security
  - ✓ Backup and recovery
  - ✓ Governance and strategy

To enhance your security profile, Neway can implement a full complement of Microsoft tools including:

**Cloud App Security**

**Azure Web Application Firewall**

**Azure Firewall**

**Azure Information Protection**

**Microsoft 365 E5 Security**

**Microsoft Defender for Endpoint, Office 365, and for Identity**

**Azure AD Premium**

**Azure Sentinel**

# CREATING YOUR SECURITY ARCHITECTURE

Neway's primary design principal is to provide a security architecture that scales and incorporates security at every level while focusing on a "Zero Trust Security Model". Our overall security design is based on the Microsoft Cloud Adoption Framework Enterprise-scale landing zone architecture, represents the strategic design path and target technical state for an organization's Azure environment. It will continue to evolve alongside the Azure platform and is defined by the various design decisions that your organization must make to map your Azure journey.

## Microsoft Cloud Adoption Framework for Azure

From security assessments to deployments to management and monitoring, Neway can help chart your path to a secure, robust, and powerful cloud architecture purpose-built for your specific business needs. **Contact us today for a complimentary security consultation.**

Microsoft Partner

Azure Expert MSP

Established in 2004, Neway Technologies provides unparalleled expertise across the Microsoft platform on a global scale. Our solutions incorporate delivering measurable business outcomes through innovative solutions leveraging Microsoft technologies and infrastructure solutions, both on-premises and in the cloud, including Office 365, Azure, Teams, SharePoint and more. Our customers represent a broad range of industries including technology and communications, financial, government, and defense.

With your critical applications and operations running on the Microsoft cloud, you need a partner, like Neway, who is **100% dedicated to the Microsoft platform.**

- Microsoft Tier 1 Cloud Solution Provider (Direct)
- Access to Microsoft funding programs
- Insight into the Microsoft roadmap to help you effectively plan for upgrades and enhancements
- **Microsoft Advanced Specializations:**
  - » Modernization of Web Applications to Microsoft Azure
  - » Adoption and Change Management
  - » Calling for Microsoft Teams
  - » Meetings and Meeting Rooms for Microsoft Teams
  - » Threat Protection
  - » Windows Virtual Desktop
  - » Information Protection & Governance
- **Microsoft Gold Partner:** 14 Microsoft Gold Competencies including Cloud Platform, Cloud Productivity, Collaboration & Content, Security, and more
- Expertise in Microsoft licensing and subscriptions to help you optimize your entitlement and reduce your overall spend
- FastTrack Ready Partner
- Comprehensive architecture, design, deployment, management, and adoption solutions
- Customized solutions through modular managed services
