Ready for Security Workshops
Assess your environment, receive recommendations, and establish a deployment plan for a secure modern workplace.

Organizations are facing new obstacles with digital security every day. Given the volume and complexity of identities, data, applications, devices, and infrastructure, it is essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward.

OUR SOLUTION
With our Ready for Security Workshops, we will demonstrate product capabilities, assess your environment to identify security risks, and develop a customized strategic plan based on your goals with the recommendations of Microsoft security experts.

You can choose from one of our three workshops, or you can mix and match based on your organizational need and desired outcomes:

**THE AVERAGE COST OF A DATA BREACH IS $3.92 MILLION.*

*2019 Cost of Data Breach Study, IBM Security

---

**Ready for Microsoft Security**
Strengthen your organization’s approach to cybersecurity by understanding how to mitigate attacks, identify threats, and gain recommendations about your security strategy.

This Workshop includes:

- Threat Check analysis
- Actionable recommendations to mitigate threats
- IT and security priority assessment
- Inside look at Microsoft’s holistic approach to security
- Demonstration of integrated security scenarios
- Long-term security strategy recommendations

**Ready for Identity Security**
Protect your authorized users’ identities by understanding your identity objectives, identifying user security scenarios, and developing a joint action plan with recommendations.

This Workshop includes:

- Development of identity goals and objectives
- Definition of your existing and desired identity security posture
- Insights into apps used within your environment
- Advisory on how to prevent compromised identities
- Development of a joint plan with key results and recommendations

**Ready for Endpoint Management**
Enable your users to be productive on any device without compromising IT security by engaging in a deep dive into remote deployment, management, and the security of corporate and personal-owned devices.

This Workshop includes:

- Education on improving your management capabilities
- Guidance on deploying policies and tools to protect endpoints
- Deployment review of multi-factor authentication and conditional access
- Enablement for your users to be productive with the apps they need, on the devices they want
Leverage the Microsoft 365 security portfolio to automatically analyze threat data across domains.

- Manage and secure hybrid identities and simplify employee, partner, and customer access with Azure Active Directory and Microsoft Defender for Identity
- Deliver preventive protection, post-breach detection, automated investigation, and response for endpoints with Microsoft Defender for Endpoint
- Get visibility, control data, and detect threats across cloud services and apps with Microsoft Cloud App Security
- Secure your email, documents, and collaboration tools with Microsoft Defender for Office 365

OUR MICROSOFT PARTNERSHIP
Apex Digital Solutions is an award-winning Microsoft Gold Partner. Our team of experts are certified in Microsoft platform and cloud solutions including Office 365, Enterprise Mobility + Security, Windows 10, and Azure.
