

Teamwork Solution Envision Workshop

Developing Your Modern Collaboration Solution

Microsoft Teams is more than just a replacement for Skype for Business and/or SharePoint. The true value lies in using Teams as a collaboration hub and tailoring it to the needs of your department, team, or organization. During this four-week engagement, the Intellinet team will work closely with your user groups to understand patterns of work and develop a template and plan for how to improve collaboration and productivity.

At the end of this engagement, you'll walk away with a formal approach to the launch of Microsoft Teams to improve teamwork, collaboration, as well as general productivity and usage patterns of the Microsoft Teams platform.

Get Started Today

4 Week Workshop Agenda & Outcomes

- **Week 1:** Deep dive into understanding how your teams function.
 - Conduct interviews with key users from user groups.
- **Week 2:** Develop a true business solution focused on user relevance and experience.
 - Create User Stories to define the most relevant solution and most valuable features to add to the roadmap.
 - Present recommendations to business and IT leaders for validation and approval
- **Week 3:** Demonstrate collaborative behaviors to create a collaborative culture.
 - Launch a sample for testing and approval by users.
- **Week 4:** Begin journey for adoption and expansion of use.
 - Provide a repeatable rollout, engagement, and sustainability plan which includes ongoing training and opportunities for expansion.
