

Accelerate Transformation

ENABLE EMPLOYEE ENGAGEMENT AND COLLABORATION WITH DECISION INC.'S INTRANET-IN-A-BOX

The intranet-in-a-box provides a communication platform that acts as the basis from which employee engagement, communication, collaboration and productivity can be driven within your business.

The intranet is pre-packaged with features we've seen to be popular and that has the most impact in the shortest turn-around with our clients.

Fast & Flexible

The intranet-in-a-box has been developed to accelerate the time-to-impact in your business and can be rolled out in a short space of time.

Additional functionality and customisation services are available as needed to meet specific client requirements.

Highlights

- Engage employees via a user friendly and inviting interface
- Centralized communications across your business
- Quick Roll-out
- Enable team collaboration

Included

- **Tenant Setup & Config:** Setup and configuration of your SharePoint Online tenant
- **Pre-packaged:** A selection of popular web parts are implemented as part of the intranet roll-out
- **Tailored:** Customization of look and feel to match your corporate identity

FEATURES

Broad Business Application

SharePoint Online offers a platform that can solve collaboration, engagement, content management and productivity challenges in the modern workplace.

Modern Sites

Making use of Modern Sites template allows page layouts to be customised according to client need with no additional development required.

Client corporate identity can easily be implemented using SharePoint themes and a re-usable site template ensures conformity as more sites are added.

Web Parts

A collection of popular web parts are included with the implementation. Additional web parts can easily be added per client specification.
