Cyclotron VIVAFY

## The VIVA Connections Experience by Cyclotron

Deploying Microsoft VIVA means investing in an employee experience that centralizes Microsoft Teams as the Hub of your modern workplace by serving communications, knowledge, learning, resources, and insights. There has never been a bigger need for technology, data and insights that are designed to enable a great employee experience regardless of your location.

VIVA is the first step in placing people at the center by bringing together systems of work with systems of support into an integrated employee experience. It provides people with the resources and support they need to succeed and thrive.

Cyclotron is your trusted partner to understand and implement the strategy on how to empower people and teams to be their best.

Viva Connections delivers a unified, personalized feed in which employees can explore news and contribute to the conversation from virtually anywhere. You can publish content from popular Microsoft 365 apps, such as SharePoint, Yammer, or Microsoft Stream, to a single feed and post the external news and content you want employees to see.

Keep everyone connected
Encourage meaningful connections across the organization by enabling employees to easily discover relevant communications and communities.

Make it easy for people to contribute
Foster a culture of inclusion by empowering every employee to contribute ideas and share feedback.

Unite and inspire your organization
Align the entire organization around your vision, mission, and strategic priorities.
