# Data democratization in a form of search, a portal to greatness.

Digital Dialogue helps enterprises in **unlocking values from unstructured and structured data in enterprise with AI & NLP-enhanced enterprise search.**

## CHALLENGES

Today's challenge for every enterprise is how to put a structure to unstructured data which is more than 80% of enterprise data, index, make them searchable and turn them into a source of insightful, revenue generating decision making, at fingertips.

The question is how enterprise is going to create a unified data structure and build a fulfilling search experience that employees demand.

## IDEAL SOLUTION

An intelligent enterprise search solution, enhanced by AI technologies such as Natural Language Processing (NLP), semantic understanding and machine learning to provide a cognitive search experience.

## DESIRED OUTCOMES

A modernized way of working by embracing data democratization within your enterprise and empowering employees in discovering data & insights they need with an intelligent and powerful search engine. An acceleration to insightful decision making.

DIGITAL DIALOGUE

CUBIKA  
search

## CUBIKA Search

A search that brings it all together with AI & NLP-enhanced enterprise search engine where insights and opportunities are waiting to be discovered.

# CUBIKA Search

An intelligent enterprise search solution, enhanced by AI technologies such as Natural Language Processing (NLP), semantic understanding and machine learning to provide a cognitive search experience.

1

## AI-powered, NLP-infused cognitive search engine

Search engine that understands user intention and return results which suit it. Along with intelligent query prediction which helps user in getting what they need faster.

2

## Data Democratization-as-Insight accelerator

With the information available only one search away, user takes less time and effort spent in locating the right information or recreating the information which already exists, analytics and decision making are accelerated with timely access to critical information

3

## Full integration to Microsoft products

CUBIKA Search works with related Microsoft products seamlessly by crawls and indexes information across multiple platforms and organize them in a secure searchable structure.

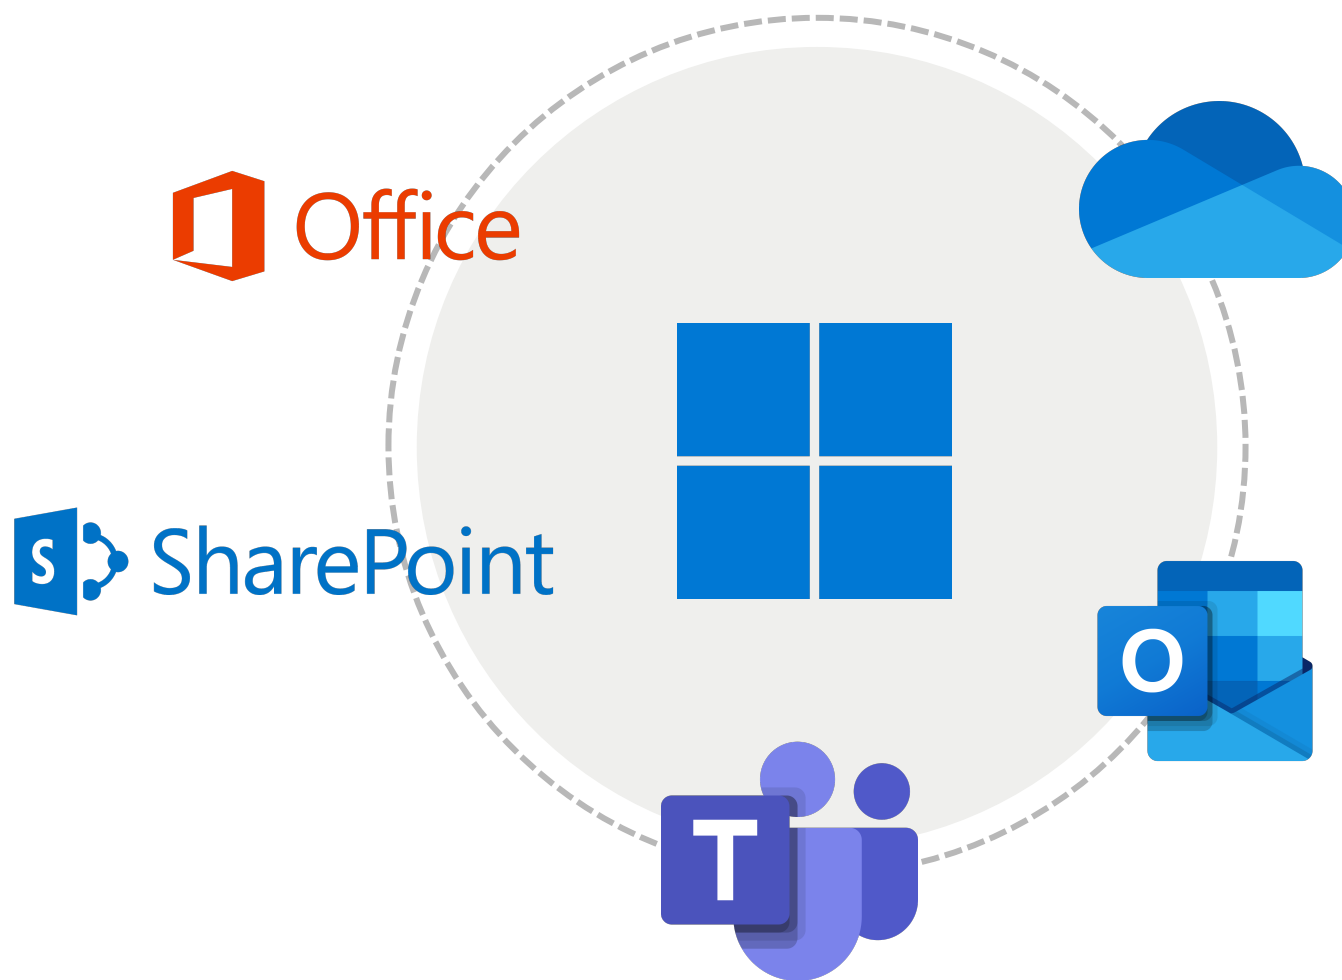

4

## Simple yet powerful search experience...in real time

Single-point-of access portal for employees to locate information, policies, procedures they need for making an informed decision.

# CUBIKA **SEARCH** integrates and indexes data and content across Microsoft products ecosystem

# Digital Dialogue's CUBIKA Search

Powered by Microsoft Azure's wide-range of products in management and governance, analytics, database and Power BI, CUBIKA Big Insights solutions help clients in achieving a future-ready, highly intelligent and automated data governance and data security platform for their data environment with less effort but with more efficiency in data management.

The result is high quality and secure data for revealing insights, fueling the business growth while establishing trust in the organization and ensuring compliance.

Digital Dialogue is Microsoft Thailand Partner of the Year for 3-consecutive year,  
including Solution Innovation Partner of the Year for data and AI.
