

POWER PLATFORM INTRODUCTION

Low-code App development provides an environment used to create business solutions through a **graphical user interface** and **configuration instead of computer programming**.

Businesses are faced with the business challenges such as:

- 37% of organizations are still using **paper** to manage **critical business processes** and there is a need to **accelerate digital transformation** and innovation.
- Some processes are best solved by **off-the-shelf SaaS solutions**. But there isn't always "an app for that." Some processes are **best solved by custom app development**.

Low-code development **solves this for you by** offering a flexible, rapid software development environment that can be used by **business users**. This allows you to build custom apps in **hours**—not months— to **solve problems faster and drive efficiency**. Low code development offers the following key benefits:

- Lower Costs
- Increase of business value
- Employee satisfaction
- Better security

POWER PLATFORM SERVICES

Cegeka has a wide range of **POWER PLATFORM SERVICES** that can be offered regarding low code app development with the Microsoft Power Platform.

EMPOWERMENT

Platform in a Day

POWER PLATFORM DEVELOPMENT

Power Platform Support Services
Power Platform Managed Services

These services can be offered **stand-alone** or as part of a **program**:

- **POWER PLATFORM ADOPTION PROGRAM**, where Cegeka supports your business in setting up a center of excellence and to adopt low-code application development based on our best practices and years of experience in application development.
- **POWER PLATFORM GOVERNANCE PROGRAM**, where further supports your organization with the governance of your application development at an operational, tactical and strategic level.

POWER PLATFORM INTRODUCTION OFFER

With our **POWER PLATFORM INTRODUCTION** offer, Cegeka will give you an in-depth **introduction into low-code app development** and will also make this **tangible** for your organization by **building an app** together with your business users in **5 days**. We will then explain and teach you how we have built the application to demonstrate how easy it can be to start building applications without computer programming.
