## PostgreSQL that provides the fastest way to migrate from Oracle to Azure

BigAnimal is a fully managed PostgreSQL cloud database on Microsoft Azure, built and operated by the PostgreSQL experts at EDB. BigAnimal offers the only cloud PostgreSQL solution with industry-leading Oracle database compatibility and the enterprise capabilities you need to run at scale.

### → The fastest way to migrate from Oracle to PostgreSQL on Azure

Reduce costs, time, and risks when migrating off Oracle by leveraging BigAnimal's deep compatibility with Oracle and comprehensive migration tools. Free your customers from Oracle licenses in the process.

### → Take more control of your data and your spend with BigAnimal

BigAnimal runs in your Azure cloud account giving you greater control and transparency over your data. Take advantage of your existing spend commitments on Microsoft Azure.

### → Supported by EDB's PostgreSQL fanatics

World-class expertise and support provided by the largest dedicated global PostgreSQL company with over 5,000+ lifetime customers including 28% of Fortune 500.

### → Integration with Microsoft Azure

Native integration with core Azure platform services, including Azure Monitor, Azure Active Directory, and Azure Billing, allows BigAnimal to fit seamlessly into your existing Azure environment.
