

What the organization gains thanks to full implementation Power BI?

The implementation of Power BI allows you to **automate business processes** that results in significant **savings of time and resources** - both financial and human resources

What is our Educational Program?

Elitmind Academy offers you a modern solution that enables simultaneous training in the field of Power BI of all employees in the entire organization. Our courses are tailored to the needs of individual teams and departments, which enables fast and effective implementation of Power BI in your company.

A solid dose of knowledge

Elitmind offers 5 types of courses adequately preparing for the challenges faced by employees of various departments of a given organization.

Training of many departments at the same time

The Elitmind Academy training platform has no user restrictions, which saves the time needed for training throughout the organization.

Ease of adding more users

If there is a need to train more employees, there is no need to wait for the group to gather. Each user starts learning at any time.

onboarding?

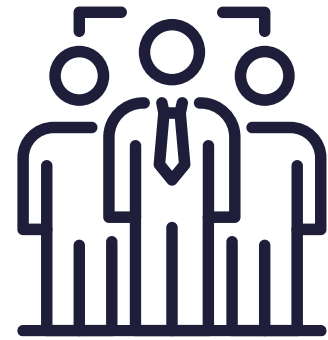

We will do it for you!

The onboarding process consumes a lot of human and financial resources. Elitmind Academy facilitates this process by equipping new employees with the necessary knowledge needed in their position.

Individual consultations

If necessary, our trainers are at your disposal - we organize individual consultations, during which we dispel current doubts or discuss additional issues.

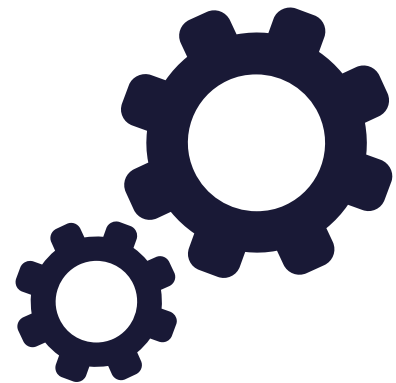

Power BI for Business Users

Learn how to effectively read, analyze and draw conclusions from the presented data.

Power BI for Report Creators

Learn how to build effective and interactive reports and visualizations.

Power BI for Analysts

Optimize operational reports on order fulfillment, as well as conduct and visualize profitability analysis in the company.

Role of the Analyst in organisation

Learn how to conduct high-level and process analysis and develop a product vision. In addition, see how databases and the SQL communication language are built.
