

Data Security: 1-Day Assessment

Primary Product: Azure

What is it?

This is a comprehensive service designed to help organizations of all sizes identify, assess, and mitigate the risks associated with their data security environment on Microsoft Azure. Cloudica will first evaluate your current security measures, then provide recommendations for improving your security posture. We will also provide a tailored action plan for implementing the recommendations. Our experienced security professionals will work closely with you to answer any questions you may have about the security assessment process.

Who is this service for?

Cloudica designed this assessment for organizations looking to get a better understanding of their security posture, identify any gaps in their security, or simply audit their current security environment.

Data Security: 1-Day Assessment

Primary Product: Azure

What are the Benefits?

- a better understanding of your current security posture,
- provide insight into potential risks and vulnerabilities,
- this will enable you to better protect your organization from data breaches and other security threats.

Outcomes of the Assessment:

- have a clear idea of your business's security posture,
- and an action plan for implementing the recommendations.

Steps and Agenda:

The 1-Day Assessment includes the following:

- **Introduction and Overview:** An introduction to the assessment process and what to expect from the day.
- **Security Audit:** An in-depth review of your security environment, including a review of current security measures and potential risks and vulnerabilities.
- **Recommendations:** Our security professionals will provide recommendations for improving your security posture.
- **Action Plan:** A tailored action plan for implementing the recommendations.
- **Q&A**
