ERP Modernization
AX Upgrade to Dynamics 365
Assessment

Why Consider Dynamics 365 Now?

Engage – Transform – Optimize - Empower

- Support for existing platforms are expiring soon and new demanding business enhancements are not available in old versions.
- Boost employee productivity using single mobile enabled modern platform
- Reduce OpEX with scalable, and cost effective platform deployment
- Harness the power of Cloud, backed by Azure infrastructure with HA/DR all included
- Capitalize on Microsoft available Incentives before they expire
- Resource contention for supporting old version
- Engage with your customers with Integrated CRM and embedded power BI analytics out-of-the gate
- Improve business processes with new capabilities and role based features of Dynamics 365.
- Discards unnecessary work around and customizations plaguing your old ERP. Up-to 35% more features in Manufacturing and Retail, hence reduce your customization effort

Cut deployment
time by up-to **94%**

Reduce Infra and
Ops Cost by up-to
45%

Lower hosting costs
by up-to **75%**

Upgrade Assessment – Benefit

Why wait and delay digital transformation in your organization

”

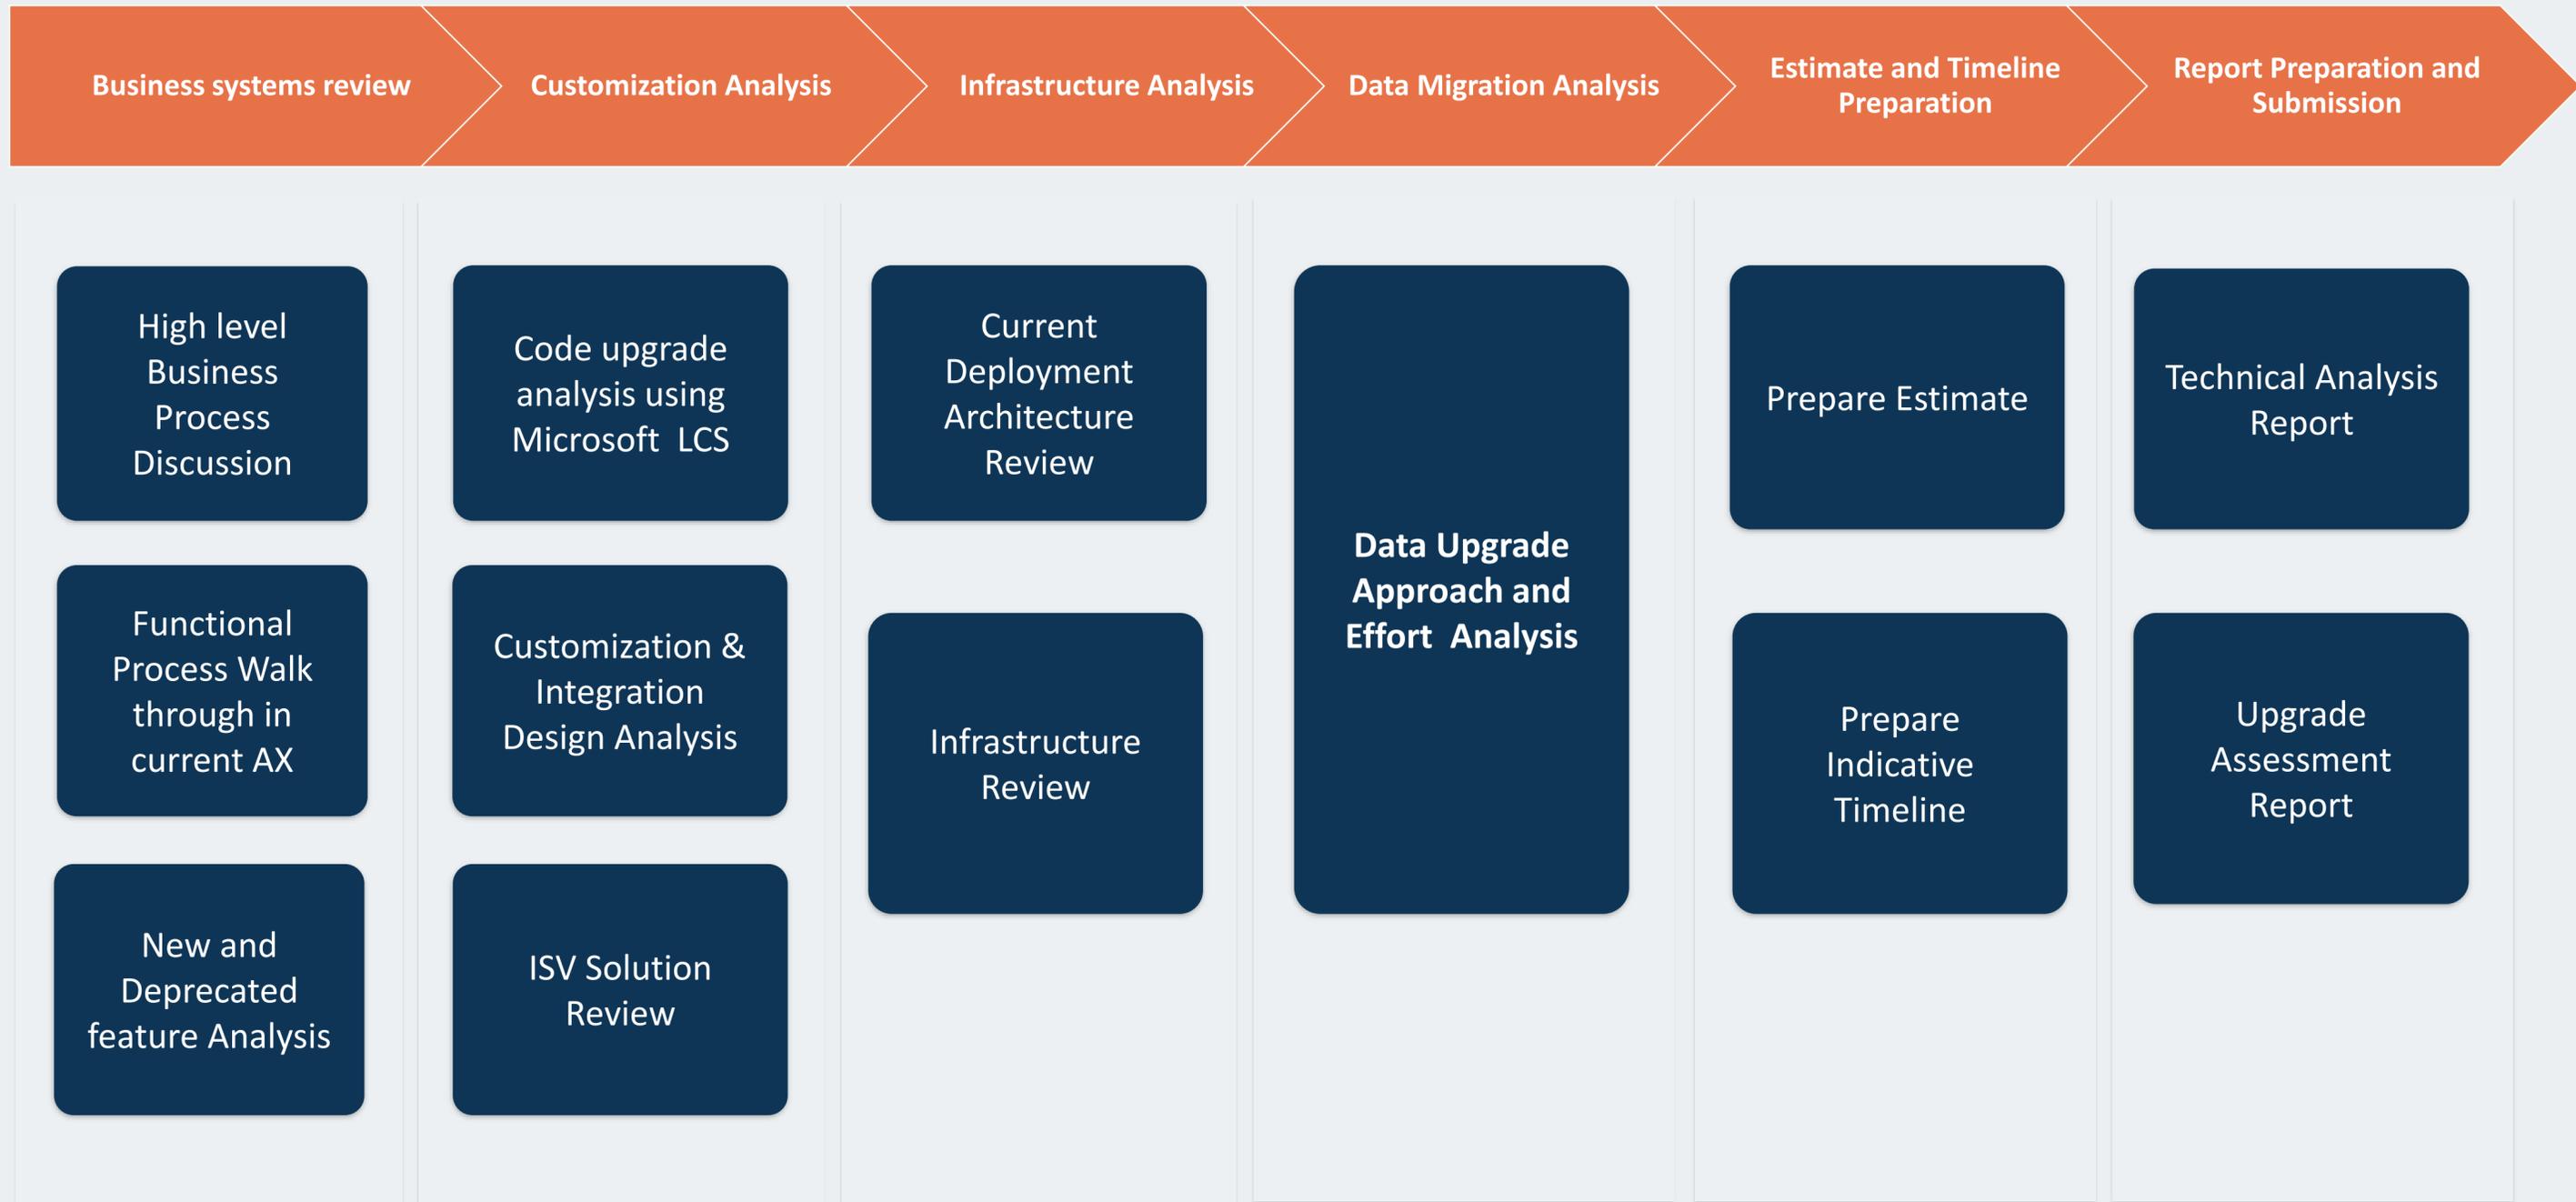

Benefits of
Assessment phase

- Assessment will help you decide about upgrade or re-implementation path.
- Provide insight on new licensing and Microsoft available incentives.
- Rationalize customized features considering new and deprecated features in new platform.
- It will provide effort and timeline for data & platform upgrade to initiate & budget the project.
