

# ATROPOSS

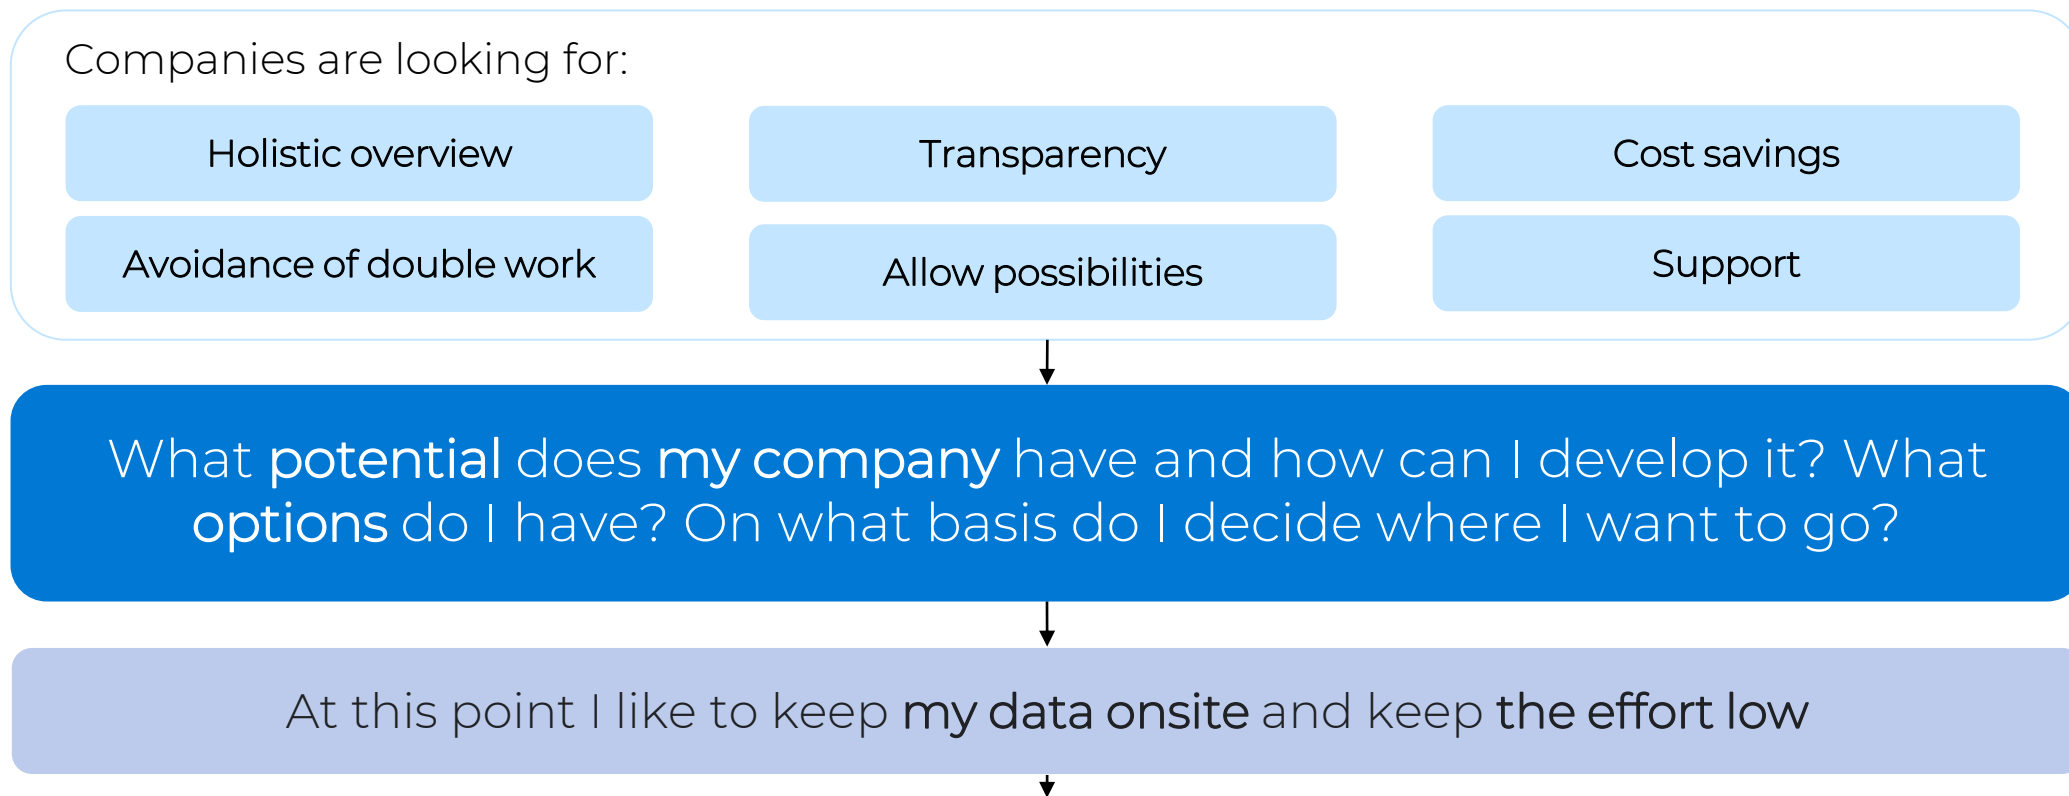

“Stateless” Solution Assessment  
for Oracle, SQL (& DB2) Database

Uwe Scheuber, 10.11.2022

# The idea of **ATROPOSS**

**Based on our market observations:**

# ATROPOSS

# The values of **ATROPOSS**

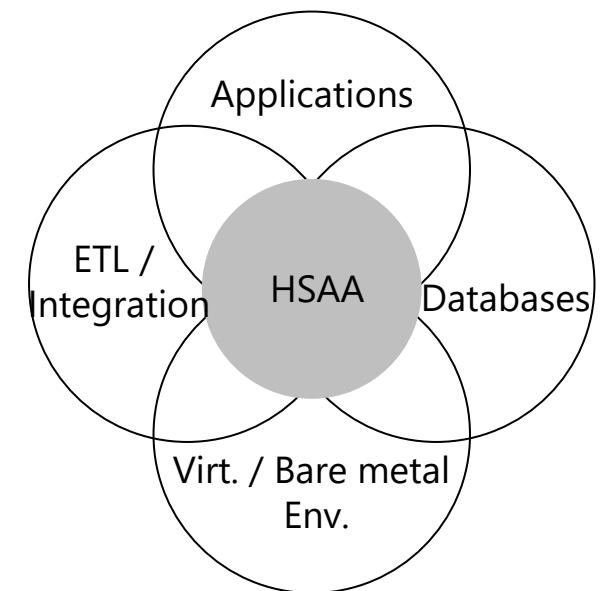

## **ATROPOSS**

- Can help give you a **holistic picture of transformation scenarios** and their conditions,
- Is a **reusable and extensible assessment solution**,
- Based on sustainable components
- Is an **open-source tool** that evolves in a strong, innovative community,
- Is available **at any time**
- Is available at any time Provides you with the knowledge of Microsoft and **our partners** and helps to minimize risks
- It's a perfect combination with the Holistic Business Case (HBC) from Microsoft

# The (current) modules of **ATROPOSS**

- **ATROPOSS** is a “stateless” pre-assessment tool, i.e.
  - **ATROPOSS** is developed as an open-source web app based on an open web standard
  - There is no need to install the tool in your environment, the data stays with you
- The tool starts with a cost analysis that shows savings potential
- The assessment is based on the validity of the data used
- The tool currently includes the following core modules:
  - Evaluation of the **database schema** with regard to the possibility of a cloud transition
  - Checking an **application** for its adaptability to the cloud
- The goal is a **holistic assessment**

Thank You!

# ATROPOSS. Identify and assess opportunities for innovation based on your data

Your reliable partner for self-empowerment.

## Your journey with ATROPOSS

How can I enable the full potential of my business? What options do I have at what costs? Which factors do I need to consider while deciding on the next or first steps? How can I avoid giving external parties insights into my data at an early stage to meet security and compliance rules?

Many companies ask how to get the journey started to achieve their full innovative potential.

ATROPOSS helps you answer these questions based on a detailed analysis. The assessment tool opens up perspectives for you by providing insights into the characteristics of your IT system, identifying opportunities for modernization and supporting the decision for the individual transformation. The service is a web-based, free application.

As a business, you can use ATROPOSS with our and our partners' support. After an introductory analysis phase, we will be happy to assist you in all subsequent modernization steps.

## What is ATROPOSS?

Easy, secure and compliant!

- ATROPOSS
- is a high-performance web app based on the open W3C standard WebAssembly that can run on [any browser](#)
- enables companies to conduct a digital assessment on their own
- evaluates mission-critical data statelessly, without remembering the information
- does not require installation or data exchange with third parties
- leaves all analysis results in the user's environment without exception

## The added values

Did you know that ATROPOSS

- can give you a holistic picture of possible transformation scenarios and their conditions
- is a reusable and extensible assessment solution
- is based on sustainable components that integrate cutting-edge technology and continue to evolve
- provides you with the knowledge of Microsoft and its partners and thus minimizes the risk of errors
- is an open source tool that evolves transparently in a strong and innovative community
- offers high reliability and availability
- supports you in minimizing your process steps and optimizing your value chain

## The service components of ATROPOSS

ATROPOSS is a modular tool that is continuously evolving. The goal is to offer a solution that highlights the individual path of your digital transformation in the broadest possible terms.

The currently available modules allow:

1. the assessment of the database schema with regard to the possibility of a cloud transition,
2. application analysis in regards of migration and modernizations options

As a first step, both modules start with a cost analysis that shows potential savings for various cloud transition options. The assessment is based on the data you provide and its informative value is therefore tied to this.

## Your support for the journey

The future-orientated analysis tool was developed as part of a collaboration project driven by Microsoft and by committed partners such as PRODYNA, CYBERTEC, Logicalis and MaibornWolff. ATROPOSS relies on the participation of these development partners and this community continuously works on improvement and further development of the solution. The common goal is to enable companies with a holistic digital assessment by giving them enough information to make decisions based on their economic potential without a major initial effort.

### Our partners
