

FINANCIALLY QUANTIFY & MANAGE YOUR CYBER RISK.

Access fast, on-demand insights into your cyber investment & strategy decisions with Kovrr Quantum.

Quantum provides actionable, financially quantified cyber risk mitigation recommendations to enterprise decision makers so you can comprehensively manage your cyber risk exposure and decide which security controls you should invest in to reduce your cyber risk exposure as well as insights into how to optimize cyber insurance strategies.

WHAT WE OFFER

Seamlessly transform your Cyber Security data from products including Microsoft's Azure Sentinel, Defender for Cloud and Microsoft 365 Defender into financially quantified cyber risk management decisions with the click of a button.

Ensure optimal returns on cybersecurity investments that strengthen a business's resilience to cyber attacks and third-party service provider failures that could lead to significant financial losses.

Benefit from a data driven approach built from the ground-up to enable evolving, objective, and frictionless financial cyber risk quantifications that deliver the CISO, CRO, the Board and other decision makers the answers they need on-demand.

Leverage the same advanced cyber risk models and technologies trusted by cyber insurers and reinsurers worldwide.

WHAT OUR CUSTOMERS ARE SAYING

"I've been eager to embrace cyber risk quantification for years but struggled to find a cost-effective path forward. Kovrr offers an actionable and validated cyber risk quantification platform. We're excited to satisfy long standing risk management goals, while we mature our internal dialogue, refine budget allocation, and realize savings."

Matthew Sharp
Chief Information Security Officer, Logicworks

Financially Quantified

Actionable

CYBER DECISIONS. FINANCIALLY QUANTIFIED.

JUSTIFY CYBERSECURITY INVESTMENTS

Prioritize and justify cybersecurity investments that maximize risk reduction.

OPTIMIZE CYBER INSURANCE AND RISK TRANSFER PLACEMENTS

Identify gaps between risk mitigation options and cyber insurance spending to maximize your risk management decisions and strengthen business resilience.

MEASURE THE ROI OF CYBER SECURITY PROGRAMS

Assess the ROI of your cybersecurity program and stress test it based on potential risk mitigation actions, thereby supporting better resource allocation.

WHY QUANTUM & MICROSOFT

EVOLVING CYBER SECURITY POSTURE ANALYSIS

Automatically assess your businesses evolving cyber posture and technographic profile by analyzing millions of data points that cover an organization's technological infrastructure and 3rd party service providers by analyzing the external attack surface and internal telemetry by leveraging data from products such as Microsoft's Azure Sentinel, Defender for Cloud and the Microsoft365 Defender.

ACTIONABLE FINANCIALLY QUANTIFIED RISK MITIGATION RECOMMENDATIONS

Get actionable financially quantified risk mitigation recommendations into which security controls you should introduce or invest more in to reduce your cyber risk exposure in the most effective way. Before you spend a thing.

INSURANCE GRADE CYBER RISK MODELS

Kovrr's unique modeling approach utilizes multiple risk models that leverage access to a wide variety of loss data sources including cyber insurance claims data.

CONTINUOUS CYBER THREAT INTELLIGENCE

Analyze the evolving risk to your business with a continual stream of global cyber threat Intelligence that can analyze the probability of hundreds of thousands of cyber events that could financially impact your business.
