Take your business to the next level of success with bank integration. One of the challenges that business face is dealing with time consuming and tedious task such as to perform bank reconciliation of all the business payments as part of the month end process.

With Bank Integration, simplify your month end process just in a few clicks along with other benefits as well

9 DOTS CONSULTING

KEY BENEFITS OF BANK INTEGRATION

SEAMLESS SECURED PAYMENTS

- Options for Automated or Manual supplier payments

MINIMIZE HUMAN ERROR

- The seamless automated flow of data will auto update the general ledger which eliminates entry errors

STREAMLINE PAYMENTS & BANK RECONCILIATION

- Payment process automated upon payment journal which auto-update general ledger and month-end statement to automate bank reconciliation

WHY DO YOU NEED BANK INTEGRATION FOR YOUR BUSINESS

Secured Integration to Connected Bank

- ❖ Import electronic bank statements, automatic reconcile with bank transactions in Dynamics 365 Finance
- ❖ With encrypted file transfers, two-factor authentication (2FA), removal of tokens and other added security controls, We ensures you and your team can access your finance network through a single secure and controlled environment.

Flat File Integration

- ❖ Mapping any file format from any bank and transform data output into a format that can be consumed by your ERP or back-office system.
- ❖ With minimal or no IT development required, minimize dependency from IT resource as all transformation is taken care of by our file agnostic platform.

Vendor Payment / Payroll Payment Automation

- ❖ Submit payments batch to signing authorities for approval in seconds.
- ❖ Payment process automatically and file encrypted to the connected bank
- ❖ Support Worldwide Payment in all currencies.
- ❖ Secured Outbound Payments from your Microsoft Dynamics 365 ERP system to any banks
- ❖ With a solution build within Microsoft Dynamics 365 and with a simple setup, you can focus on running your business, processing payments locally or as a global enterprise

Bank Reconciliation Automation

- ❖ Consolidated processes, configurable workflows with access to information and support to help you achieve greater control.
- ❖ Auto bank reconciliation and validation
- ❖ Settings that ensure data consistency in support of matching system and external bank transactions
