

Ironclad security starts with your devices

Cybersecurity threats are increasingly frequent and sophisticated. Outdated hardware and software can increase security risk and complexity.

[Explore Windows 11 Pro devices](#)

Businesses reported a 58% drop in security incidents with Windows 11 Pro devices.¹

With Windows 11 Pro, you can boost security and productivity with world-class fundamentals across devices.

Powerful out-of-the-box

Protection from the moment you turn on your device

Personalized experiences and simpler workflows

Exceptional reliability, long battery life, and great performance

¹ Techaisle, SMB Windows 11 Survey Report, February 2022. Windows 11 results are in comparison with Windows 10 devices.

Find the right devices for a hybrid workforce

Frontline workers

We're always front-and-center, often moving between customers. Our work is task-oriented and relies on a few key apps.

Our wish list? Security, simplicity, and reliability—with plenty of battery life.

[See device features](#) >

Information workers

We are master multitaskers. Whether we're working from home or the office, our desks are our command centers.

To keep our days running smoothly, we prioritize security, reliability, and performance.

[See device features](#) >

Executives

For us, everyday is different. We're always working with diverse teams and navigating shifting priorities.

What captivates us? Tight security, top collaboration capabilities, and a sophisticated look-and-feel.

[See device features](#) >

Power workers

Our work keeps us heads-down and super focused. We use specialized apps for compute-intensive workloads like data modeling, CAD, and video editing.

We're looking for exceptional security, power, and speed.

Flexible and streamlined feature selections

Security Foundation

Layers of protection with tightly integrated hardware and software for the most secure Windows ever

Productivity features

More intuitive and personalized user experience for greater productivity

Windows Hello

Facial recognition and fingerprint recognition with secure authentication for a more personal, protected way to unlock Windows

Secured-core PC

Additional safeguards enabled to shield the most sensitive data from sophisticated threats, including firmware attacks

SIM support with 4G/5G LTE connectivity

Secure connectivity to 4G or 5G LTE networks on the go with built-in SIM card support

Remote work

Devices equipped with remote management, out-of-the-box security, and collaboration tools

Touchscreen

Increased accessibility with keyboard-free interactions

Battery life

Longer battery life to last through the day, with plenty of unplugged time

Windows Ink

Freehand writing, drawing, and inking on modern devices—write with a digital pen in any app

Affordability

Modern hardware powered by the most secure Windows at an economical price

Thin and light

Slim and seek form factor for comfort and convenience

Windows 11 for workstations

Advanced configurations and higher processing speed to fuel performance

Devices designed for efficiency and reliability

With Windows 11 Pro, even the simplest, most cost-effective device has security on by default. Frontline workers in varied roles benefit from an interface redesigned for focus and simplicity. Intuitive experiences and flexible interactions with touch, pen, and voice make it easier for workers to engage.
