Rapidly build apps in-a-day – 8 hr workshop

Introduction – Create, share, use and modify applications using your own data and internal company structure. No special skills needed, just enthusiasm.

In our specially designed for beginners 1 day workshop we will guide you through the Microsoft Platform for creation of Apps. At the end of the day you will know how to create your own app so that you can manage information, users or actions with already available tools in your Office 365 personal or company Account. Creating apps has been never easier - start now!

Workshop Agenda:

Theory:

What is Power Apps and how to start using it

Power Apps predefined templates (available on demand in every Office 365 Account)

Canvas Apps – models, limitations, data sources

Model Driven Apps – usage, data sources

Data Verse – the ultimate Database as a software dev. Service.

PowerApp Make
