

Dynamics 365 Business Central: 6-Week SMART Implementation

A rapid implementation of Dynamics 365 Business Central based on SHEA SMART standardized business processes and best practices

SHEA Global offers a rapid end-to-end deployment of Dynamics 365 Business Central based on their SMART preconfigured and documented best practice business processes and implementation standards. SHEA's SMART methodology allows you to save time and money on discovery by adopting industry standards and streamline your business processes at the same time. The service is NOT a train-the-trainer self-configuration tutorial, but an end-to-end implementation from configuration through training to go-live.

The standard includes:

- Readiness assessment
- Configuration and process review
- User training
- Data conversion
- Financial report design
- Go live support

The standard does not include:

- Any modifications
- Multiple companies or currencies
- Third parties or integrations with other systems
- Consolidation and intercompany transactions

The initial implementation is limited to:

- General Ledger
- Invoicing (non-stock items)
- Accounts Receivable
- Accounts Payable
- Bank
- Financial reporting

Fixed price **\$30,000USD**
