Enterprise Mobility and Security

4-Week Implementation

There are many benefits to KTL's Enterprise Mobility and Security (EMS) solution including mobile device endpoint security, data loss prevention, increased productivity, mobile content management and reduced technology overhead.

KTL's EMS implementation includes:

Configuration of Azure Active Directory, Conditional Access Policies, Azure Information Protection, Endpoint Manager and AppLocker.

Benefits

EMS is an intelligent mobility management and security platform which helps protect and secure your organization and empower your employees to work in new and flexible ways.

EMS provides:

- Identity and Access Management
- Information protection
- Threat protection
- Cloud security

Empowered Workforce

- Employees can work anytime anywhere and can access all apps with a single sign-on.

Security

- Companies achieve data protection across all devices

Cost Savings

- Reduced IT infrastructure and decreased risk of data breach result in cost savings.

Deployment and Configurations

- Azure Active Directory
- Endpoint Manager

- Conditional Access Policies
- Azure Information Protection

- AppLocker

EMS provides greater protection, detection, and response capabilities for your mobile workforce.
