KTL Solutions

Enterprise Mobility and Security (EMS)

4-Week Implementation

EMS is an intelligent mobility management and security platform which helps protect and secure your organization and empower your employees to work in new and flexible ways.

Challenges

Protect and empower your team

Stay secure and productive anywhere, on any device, with identity and intelligence-driven solutions.

Many employees prefer to use their mobile devices to complete tasks on the go. But the rise in use of mobile devices brings with it increased security risk.

Ideal Solution

EMS

Enterprise Mobility and Security (EMS) is an intelligent mobility management and security platform.

The cloud-based program promotes mobility while ensuring security, allowing administrators to easily manage accounts, change passwords, and monitor data.

Desired Outcomes

Benefits of EMS

Employees can work anytime anywhere and can access all apps with a single sign-on.

Companies achieve data protection across all devices and realize valuable cost reduction as IT infrastructure decreases and risk of data breach is reduced.

Enterprise Mobility and Security: 4-Week Implementation

KTL SOLUTIONS

KTL Solutions is a Microsoft Gold Partner with multiple competencies including Application Integration and Cloud Productivity.

Identity and access management

- Ensure secure connections between people, devices, apps, and data.
- Increase your security and productivity with a single, holistic identity solution that gives you flexibility and control.

Information protection

- Protect your sensitive data everywhere, even in transit and when shared.
- See and control how files are used with a comprehensive and integrated information protection solution.

Threat protection

- Detect and investigate advanced threats, compromised identities, and malicious actions across your on-premises and cloud environments.
- Protect your organization with adaptive, built-in intelligence.

Get greater protection, detection, and response capabilities for your mobile workforce.

KTL's EMS Utilizes Multiple Microsoft Solutions
KTL provides secure IT solutions for SMB and Enterprise customers by deploying and configuring Microsoft applications.

Solution Alignment

Azure Active Directory

The Azure Active Directory (Azure AD) enterprise identity service provides single sign-on and multi-factor authentication to help protect your users from 99.9 percent of cybersecurity attacks.

Azure Information Protection

Azure Information Protection (AIP) is a cloud-based solution that enables organizations to discover, classify, and protect documents and emails by applying labels to content.

Endpoint Manager

Endpoint Manager includes the services and tools you use to manage and monitor mobile devices, desktop computers, virtual machines, embedded devices, and servers.
