

Azure Cloud Foundations 4-Week Assessment

4-week workshop to design a comprehensive roadmap to a successful Microsoft Azure implementation

Access guidance, best practice leadership and strategy to accelerate your adoption of Microsoft Azure.

The Microsoft Azure Cloud Foundation Accelerator assists clients in the design and implementation of a secure, scalable and operationally ready Enterprise Scale Landing Zone to meet their unique business and technical requirements. It provides clients with the required guidance, best practices and strategy for the rapid adoption of Microsoft Azure for production or non-production services. Leveraging our knowledge in Azure Bicep and Infrastructure as Code we are able to rapidly deploy Azure in a consistent manner.

Aligned to the Microsoft Cloud Adoptions Framework (CAF), our Azure Accelerator build on the foundation Microsoft provides and incorporates our experience and third-party best in class partner solutions to provide customers with a comprehensive Enterprise Scale Landing Zone to a successful Microsoft Azure adoption.

The service focuses on the following key areas of an Enterprise Scale Landing Zone:

- Management Groups
- Subscriptions
- Identity, Access & Management
- Role Based Access Control
- Networking
- Virtual Networks & Peering
- Subnets
- Virtual Network Gateways
- Site-to-Site Connectivity / ExpressRoute
- Routing
- Firewall
- Security
- Defender for Cloud
- Governance
- Azure Policy
- Logging & Auditing
- Azure DevOps and Bicep Deployment process
