Accelerated Migration

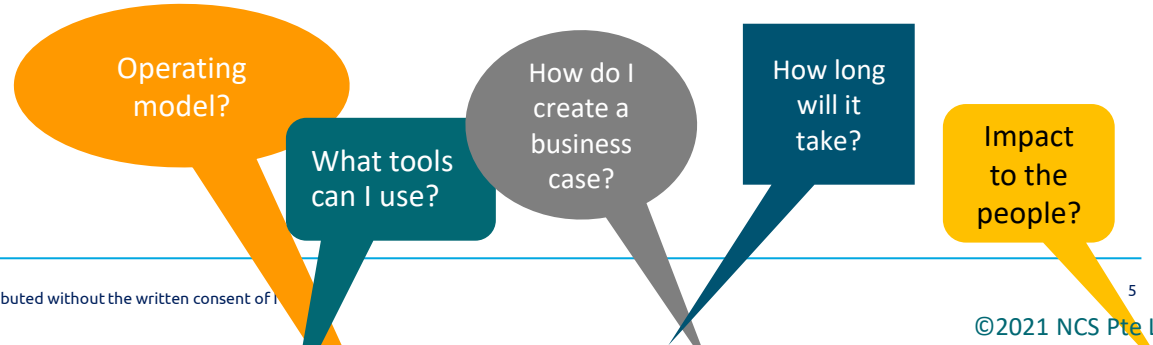

Recent pandemic has forced our clients to accelerate their cloud adoption initiative so that they can reinvent their offerings and develop new business models. The cloud has become more important than ever before to drive our client's digital transformation agenda and they are now embarking on more aggressive plans to move their workloads to the cloud. In NCS, we understand the importance of any migration and have the right experience and expertise to help our clients with assessment analysis, planning and execution in order to ensure that the change will not be disruptive to the business

## NCS Trusted Advisory

- Supported by NCS applications and consulting expertise
- Accelerated migration with minimal downtime
- Proven methodologies supported by experiential best practices
- Large scale enterprise systems integration and migration experience
- Large pool of Azure Certified Architects and Engineers

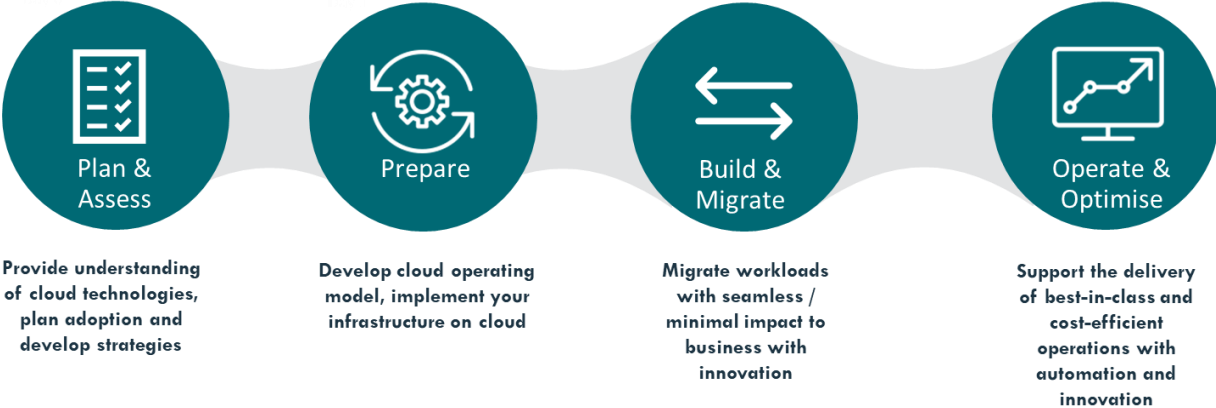

### Addressing Customer's Key challenges

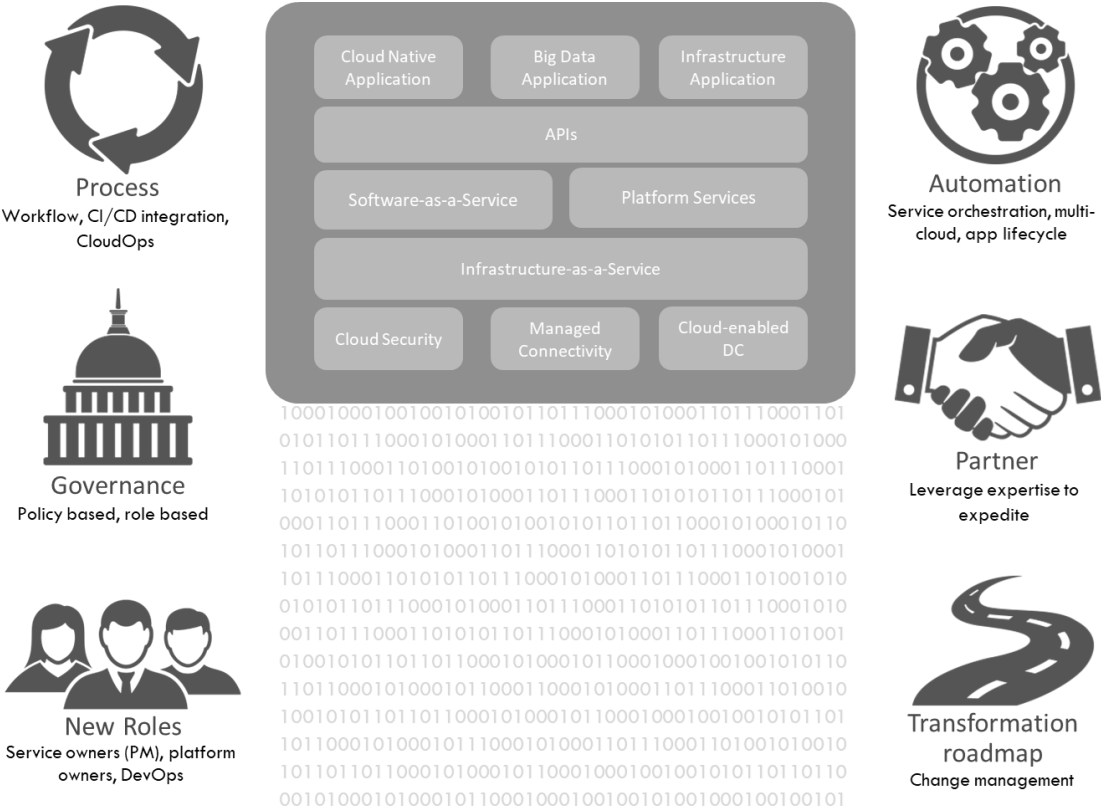

# NCS is your trusted partner with expert resources supporting you in every step of your cloud journey to deliver outcomes that matter to your business

## What NCS offers

## We understand what it takes to be successful

### Cloud Operating Model

# Cloud Migration Services (Virtual Machines)

## Offering Overview

- The Cloud Migration Services for Virtual Machines accelerates the cloud adoption journey with seamless, cost optimised and low-risk approach
- Service Coverage:
  - Plan & Assess resources and services to be migrated to cloud on based on suitability, load optimisation and dependencies on applications
  - Design and build new cloud architecture / operating model
  - Prepare pre-migration activities and planning for phased approach
  - Define method of migration, tools and process for executing
  - Actual Migration with validation and transition to operations after migration

## Client's Pain Points

1. Lack of a cloud managed service partner that can deliver effective migration services to a fit-for-purpose cloud managed service, with a viable cloud operating model, including required security controls and management
2. Lack of a holistic cloud managed services partner that can provide new add-on technologies in cloud through innovation and agility
3. Lack of a cloud managed services partner competent in managing cloud resources with optimisation from automation and A.I, monitoring actual consumption and providing commercial improvements back to the client
4. Compliance and audit requirements, requiring a competent MSP to deliver the necessary controls
5. Lack of a cloud managed services partner that can provide value in managing hybrid cloud native platforms across public and private cloud.

## Elevator Pitch

1. Do you know how to start your cloud journey with a proper transition from your existing managed service?
2. How do you ensure that your managed service partner can provide the "right" type of innovation and services in your journey to cloud?
3. What has been your Cloud Managed Service been? Chaotic and crumble-some and not outcome driven?
4. Has your digital transformation journey stalled by a managed service partner that does not play to your requirements and perform to your expectations?

## Value Proposition

1. Established approach to run cloud managed services with proven methodologies, processes and experienced professionals
2. Optimised process through digital enablers and automation
3. Continuously enhancing people, process and technologies to align to our client's business requirements and ambitions
4. Continuously innovating to new cloud and digital services to remain tightly aligned with our clients and technologies available in the market
5. Trusted advisor for Hybrid Cloud Platforms & Managed Services
6. Define an actionable digital transformation roadmap with a proper operating model to suit business and IT changes.

## Why NCS?

1. Azure VMs deployed and managed to date
2. Established Azure Certified & Experienced Professionals (total of 400+) in NCS
3. Established Cloud Migration Methodology & Services with Cloud Managed Services
4. 7 cities with Cloud Delivery presence
5. Microsoft Gold Partner
6. VMware Tanzu / Modern Apps Platform Solution Competency
7. Red Hat Premier Partner
