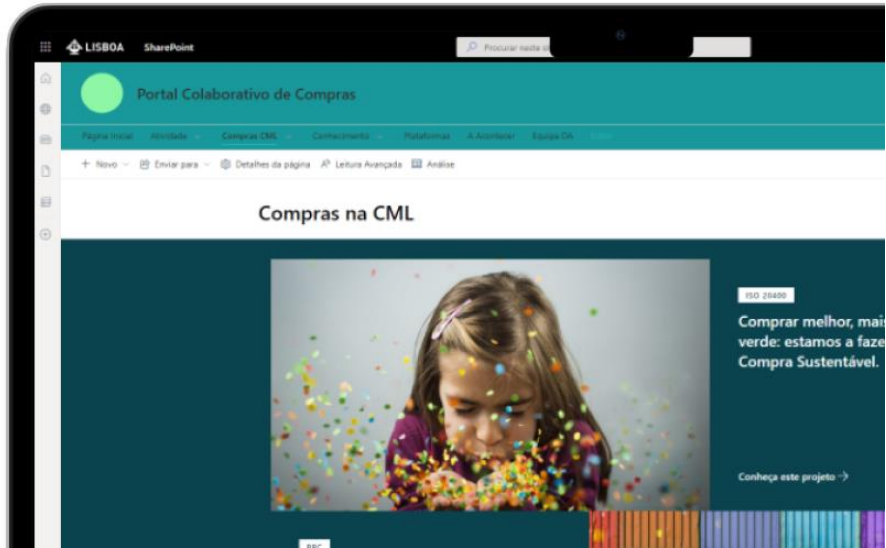
Portals & Collaboration Consulting Services

About Portals & Collaboration

Successful organizations are driven by collaboration and information management. In a world where people can increasingly work from anywhere, office communications are more important than ever, and an intuitive channel for employees, partners, and customers give organizations an edge over competitors.

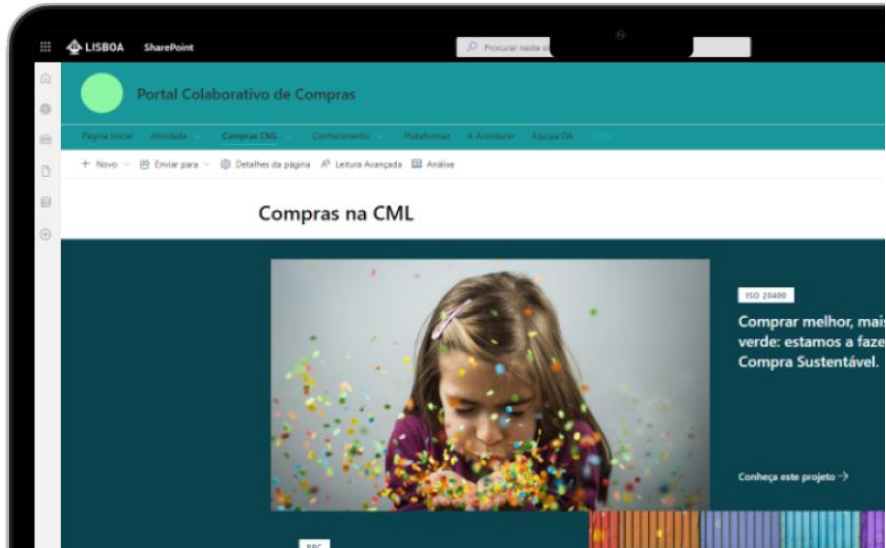
DevScope's Portals & Collaboration team has developed portals for entities of all sizes, deploying solutions in record time and providing any necessary assistance.

DevScope's Portals & Collaboration services bring digital transformation to organizations and change the way people work and interact in a professional environment.



Our consultancy services include:

- **Migration** – we migrate your company's portal to the latest version;
- **Custom Development** – internet, intranet and extranet portals, tailored to your specific needs with SharePoint and .NET technologies;
- **Documental Management** – we assist businesses in structuring document flows and supporting continuous document circulation;
- **Upgrade** – we upgrade your company's current portal as far back as SharePoint 2007 and provide the necessary assistance to learn new features;
- **Training** – we train your team to expertly use the new company portal in just a few hours;



SOGRAPE
ORIGINAL LEGACY WINES

The challange: Sograpе wanted a single platform to connect its universe of over 1,000 employees and change the way people work and communicate between themselves and the company.

What we did:

- Developed and delivered WINet – Sograpе's new intranet portal – in just six months.
- Developed a tailored multi-language user-centered intranet experience with dynamic content.
- Developed a set of features and tools that enrich WINet by simplifying processes and providing users the tools to make them more productive.
- Integrated several Office 365 services with SharePoint Online, creating a modern workplace and connecting over 1,000 Sograpе employees around the world.

The results:

- In 6 months, over 50% of Sograpе employees were using WINet.
- Each collaborator at Sograpе is now connected to more than 2.000 of their peers, and the opportunities to share their experience and collaborate are endless.
- WINet won best intranet at the European Excellence Awards 2019.

Who is Who
Find all Sograpers around the world
Our diversity makes us unique. This extended family includes people with different interests and profiles, with different experiences and needs. At WINet, they're all there! And the more we want to say about ourselves, the easier it is for us to be found. From now on, we will be able to meet all of our colleagues around the world: know who is who, where they are, what they do and get in touch directly with them. Search by name, job title, job family, business unit and more to find who you are looking for!

Creating Original and Legacy Wines
We believe that our growth will be driven by combining our Family spirit with a peak performing culture and in consistently offerinfg top quality wines and great brands. Creating an Original Legacy Wine is to create a wine that has origins and originality and that has a body and soul. It's appealing and appreciated, it's a Legacy for the future and a source of Sograpiness.

LISBOA
CÂMARA MUNICIPAL

The challange: The Lisbon City Council (in Portuguese, Câmara Municipal de Lisboa) wanted to improve its remote working experience by creating communication channels and centralize information in a collaborative portal. With the whole department using Microsoft 365, SharePoint Online became the main contender to overcome this challenge.

What we did:

- A SharePoint intranet to address the department's information and communication needs while providing collaboration and training tools that are simple to use and at the same time very flexible and centralized.;
- Centralized and normalized the main internal public procurement guidelines;
- Integrated a previously developed Power App that helped streamline the public tender process;

The results:

- The Collaborative Public Procurement Intranet on SharePoint Online became the working hub for the Financial Department;
- With the new portal, workers have information at hand, never miss a piece of important news and stay on top of the public tender process. Usage of the Collaborative Public Procurement Intranet is high and is tracked using Power BI reports embedded in the portal itself.
- The Collaborative Public Procurement Intranet matured, and the Public Procurement Department decided to extend it to workers in other departments whose activity included public procurement.
- The experience has been so positive that other organic units at the Lisbon City Council are looking to develop portals for their own core areas.

https://devscope.net/case_study/case-study-lisbon-city-council/

The challange:

- PRIO had an on-premises SharePoint intranet that was showing its age: its interface was dated, and some key-functions were either lacking or accessible through an external service.
- Save for a couple of links, employees rarely had a reason to use it.

What we did:

- Migrated an on-premises corporate portal to SharePoint Online.
- Updated it to the modern SharePoint experience.
- Built a set of custom web parts on top of SharePoint Online that integrated with SAP web services, providing employees a simple user interface to day-to-day tasks (expenses, car requests, etc.)

The results:

- the portal became widely used and is now part of PRIO's everyday life.
- the portal currently hosts over 30 websites created by PRIO employees with zero problems.

Logoplaste

Client Profile: Logoplaste is a leading global designer and manufacturer of value-added rigid plastic packaging solutions to a wide range of blue-chip clients. Founded in Portugal in 1976, Logoplaste invented the “wall to wall” business model, supplying packaging from plants installed directly in the clients’ site. The company currently manages 63 factories in 16 countries all over the world.

Needs: During the past decade, Logoplaste has grown fast, covering many geographical areas, from the USA to Vietnam, Poland to South America. Their old flash website was outdated and didn’t mirror the company’s DNA, its attitude, massive expansion nor its ambition. Not willing to risk losing new business due to wrong perceptions caused by an outdated site, Logoplaste decided to reform it and build a brand new one.

What we did:

- Implemented the front-end design ALTA Digital developed for Logoplaste;
- Gave Logoplaste’s a new dynamic, fully customizable and easy to use back office on Umbraco CMS;
- Managed the project from start to finish between three companies;

Technologies and tools: Umbraco CMS, .NET MVC, Bootstrap, Azure, Azure App Service, Azure SQL Database

Carlos Sá

With a degree in Electrical and Computer Engineering from Faculdade de Engenharia da Universidade do Porto, Carlos Sá joined DevScope in 2015 as a SharePoint Developer until he took on the role of Tech Lead for the Portals team 3 years later. Over this time, he was key in growing this team, leading numerous projects in SharePoint, Office 365, and the various tools that make up Microsoft's Power Platform.

He’s managing the Portals & Collaboration Team at DevScope since 2022.
