

# FileWall™ for Microsoft 365

Comprehensive ransomware & malware protection for Microsoft 365 users; designed to complement EOP & Microsoft Defender.

## The Challenge - 90% of the files in use by hackers are Office 365, PDF and archive

With 10 billion malware attacks annually, Files are the threat vector of choice for hackers and cybercriminals. Hackers utilize the frequent usage of files and file sharing platforms to inject malicious code into a company. In fact, 90% of the files hackers use to deliver their malware are standard files including Office 365, PDF, and Archive. As new unknown malwares are released daily, they manage to bypass the standard security systems which use detection-based methods for anti-malware. The risk becomes even greater for organizations using cloud-based business applications. Such companies trust their cloud service provider and believe that they are safe from cyberthreats by simply using the cloud service. Unfortunately, most cloud applications require the deployment of additional security solutions to better protect the organization assets.

## FileWall – The ultimate malware prevention solution for Microsoft 365

FileWall prevents malware infiltration to the organizational Microsoft 365 deployment by disarming malicious code from files. Uniquely, FileWall protects files from known and unknown future attacks – where legacy solutions fall short. FileWall is a must have native security solution for Microsoft 365 and provides the ultimate protection against file-based cyber-attacks across Microsoft 365 business applications. The services currently supported in the package are Exchange online and SharePoint. Microsoft Teams and OneDrive will be added to the package shortly at no additional cost for its users.

### Patented Technology

FileWall is the first CDR native application within Microsoft 365, publicly available on Microsoft AppSource and Azure.

### Click Deployment

FileWall can be directly purchased via the Microsoft AppSource/Azure with click service activation and zero onboarding.

### Deep File Analysis

Leverages CDR technology and deep file analysis to all nested and embedded files to remove malicious content.

### Only \$29 per year

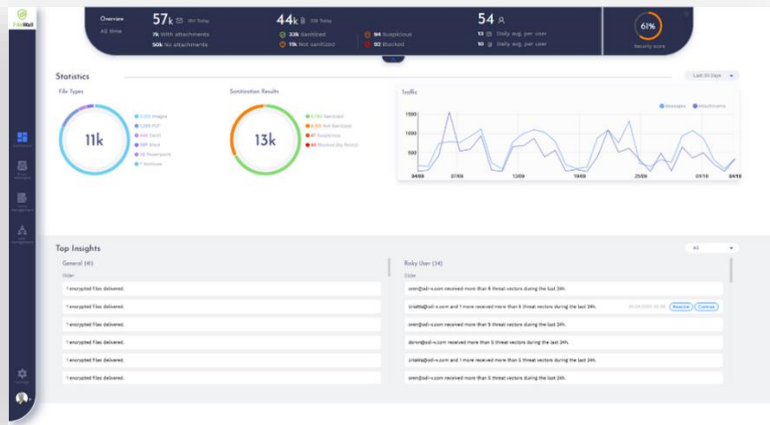

Provides military grade files security at an affordable price for any business. Yearly price is per user.

## FileWall Solution

FileWall is powered by odix's field-proven True Content Disarm and Reconstruction (TrueCDR™) core technology and offers new disruptive approach to cyber threats. This patented technology scans, disarms and rebuilds files into clean versions that can be safely used by users. odix TrueCDR™ technology removes both known and unknown malicious code from a wide range of file types, while encapsulating three functional phases within various security processes:

- Policy enforcement
- Smart TrueType check
- Content Disarm and Reconstructions

FileWall's comprehensive admin console enables overall visibility, insights, and management of its processes.

## Users Reviews by Microsoft MVPs

odix highly appreciates the FileWall user's community feedback provides on Microsoft AppSource and other platforms. We are looking forward to expanding the FileWall cybersecurity coverage for hundreds of millions of users within the broader Microsoft 365 community.

### It is the best for protection

FileWall helped us to resolve our email security issues. Although we used many security tools before but File Wall beats them all, it's the best to provide the required security to protect your business save your budget. The tool was able to achieve the highest level of satisfaction for both the IT employees and the company's employees

Mohamed Elsherif

### Great security add-on for Exchange Online

FileWall is a great security add-on for Exchange online. It was super easy to configure it and the user/admin interface is super intuitive. It catches a number of attachments which passed through EOP without problems. In today's environments where a lot of malware is coming via email and users are opening all messages and clicking

Emanuel Ceciu

## Try FileWall today

FileWall is available for a 30-day free trial and direct purchase at the [Microsoft AppSource](#) and the [Microsoft Azure](#) Marketplaces or via FileWall authorized partners.
