

Hakuna Matata's Experience Design Service

Our design services helps enterprises to create unparalleled digital experiences for their employees, customers and suppliers.

Our service helps forward-looking companies across industries design truly digital experiences for their stakeholders - employees, customers & suppliers. It includes four weeks of design sprints that can be customized to fit your business needs.

The pain point for most of the enterprise is in converting their idea into the digital application which meet the user expectations and easy to adopt. Our unique model CB4UBD (See before you build) helps the users to see and navigate through the app and discuss with peer managers before the app is developed

BRD

Our Business analyst develops an exhaustive BRD would contain all features and functionalities for all the application users . It also integration points with external systems and defines system boundaries.

TECHNICAL SOLUTION

Tech consultant validates and provides app architecture, technical feasibility and recommended technology stack.

UX /UI

Interactive Wireframes of the app is designed by our UX Engineer . Wireframes is the blueprint of how your would look like. It would visually depict the information and interactions

NAVIGATIONAL MOCKUPS

Our visual designers create visual style guide & visual screen design of your app & plug any gaps in the wireframes. It complete with colour schemes, fonts and icons.
